National Association of Metallurgical and Materials Engineering Students
University of Lagos Chapter

The NAMMES Hub Handbook

Second Edition · October 2026

Published by the National Association of Metallurgical and Materials Engineering Students (NAMMES), University of Lagos Chapter, as a free companion to www.nammeshub.com.ng.

© 2026 NAMMES Hub. All rights reserved. You are welcome to download, print and share this handbook with fellow students, provided it is shared whole and free of charge.

This handbook describes NAMMES Hub as it stood on **10 October 2026**. The Hub is updated continually by the executives, so screens, wording and features may change, and pages shown empty here may since have been filled. The latest edition can always be downloaded from the footer of the Hub.

Screenshots were taken from the live public website. Course, event and form names shown are examples of the content published at that time.

Set in Playfair Display and Public Sans.

A Word Before You Begin

Every session, hundreds of students ask the same questions: *Where is the outline? When is the exam? What happened to that link?*

NAMMES Hub was built so the answer is always one address away. It gathers everything the association publishes (outlines, timetables, resources, events, news and opportunities) and adds tools that make student life easier, like the CGPA calculator, the awards, the forms and live quiz games.

But a tool is only useful if you know it is there. That is why this handbook exists. It walks you through every page, in plain language, from creating your account to nominating a classmate for an award. If you are an executive or admin, the final part shows you how to keep the Hub accurate, safe and alive.

Read it front to back once, then keep it on your phone. When you forget how to do something, open the contents page and jump straight to it.

This second edition adds the academic calendar, timed practice exams and the sharing of quiz results, all of which arrived after the first edition went to print.

We wrote this book together, ten executives with ten roles and one goal: that no member of the department ever feels lost on their own website.

01

Welcome to NAMMES Hub

One website for everything the association publishes, built by students for students of Metallurgical and Materials Engineering at the University of Lagos.

IN THIS CHAPTER

- What NAMMES and NAMMES Hub are
- What you can do here, at a glance
- How to read this handbook
- A map of the whole Hub

to the department, the faculty and the university.

The department itself was created in 1973 to help drive Nigeria's industrialisation. It is the link between raw mineral extraction, refinement and advanced materials design, and its members regularly stand out across the whole Faculty of Engineering.

What is NAMMES Hub?

NAMMES Hub is the association's official website, found at www.nammeshub.com.ng. Before the Hub, a course outline lived in one group chat, a timetable in another, an event flyer somewhere else. The Hub brings all of it into one place that is always up to date, works on any phone or computer, and needs nothing to be installed.

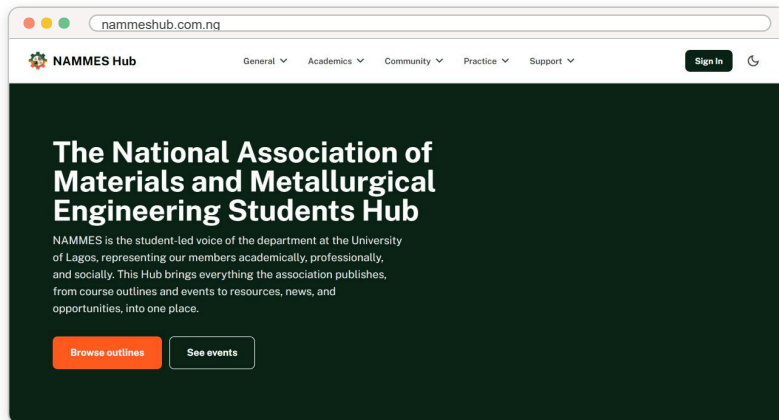

Figure 1. The NAMMES Hub home page: a welcome banner, the latest news, upcoming events and the executives.

What you can do here

ACADEMICS

Study smarter

- See lecture, exam and registration **dates** on the academic calendar
- Read a detailed **outline** for every course
- Check your class and exam **timetable**
- Track your grades with the **CGPA calculator**
- Find shared **resources** and past questions

COMMUNITY

Stay in the loop

- See upcoming **events** and past photo galleries
- Read department **news**
- Spot **scholarships** and internships
- Nominate and vote in the **awards**
- Play **live quizzes** and battle friends

TAKE PART**Have your say**

- Fill in surveys, registrations and applications
- Contribute your own past questions and notes
- Practise timed **CBT exams** with a clock and a pass mark
- Build a quiz from your own questions and share the link
- Message the executives through the contact form

ADMINS**Run the association**

- Publish news, events and opportunities
- Build forms and read the responses
- Run an awards season end to end
- Host live quizzes at events
- Email every member at once

How to read this handbook

This book is written for a complete beginner. Read it front to back once, or jump straight to the chapter you need using the table of contents. Every chapter about a page starts with a small **At a glance** box so you know the address, whether you need to be signed in, and who the page is for.

Look out for these boxes as you read:

👩 TIP

Shortcuts and habits that save you time.

① GOOD TO KNOW

Background that helps you understand why the Hub works the way it does.

⚠ CAREFUL

Things that cannot be undone, or that commonly go wrong.

Part Five of the book is written for **admins** (the executives and anyone they trust to run the Hub). If you are a regular member, you can stop after Part Four and still know everything you need.

① GOOD TO KNOW

The Hub is updated all the time by the executives. Pages that look empty in this book's screenshots (for example News or Opportunities) fill up as items are published. Screenshots were taken from the live site on 10 October 2026.

A map of the Hub

Everything on the site sits under one menu bar, sorted into five menus. This is the whole map in one glance:

General

Academics

Community

Practice

Support

ACADEMICS

- **Calendar:** lecture, exam and registration dates alongside departmental events
- **Outlines:** course by course
- **Curriculum:** the official CCMAS
- **Timetable:** classes and exams
- **CGPA:** grade tracker
- **Resources:** shared materials

COMMUNITY

- **Events:** workshops and galleries
- **News:** announcements
- **Opportunities:** deadlines
- **Awards:** nominate and vote

PRACTICE

- **Quizzes and battles:** join a live game, practise, or duel a friend
- **CBT practice:** timed exam papers with a clock and a pass mark
- Or build a quiz from your own questions and share the link

GENERAL AND SUPPORT

- **About:** our history, mission and values
- **Forms:** registrations, surveys and applications
- **Contact:** message the executives

Also: **Meet the Excos** (the executive team), **Sign In / Sign Up**, your **Account** page, and the **Admin** area for executives. Chapter 3 walks through the menus in detail.

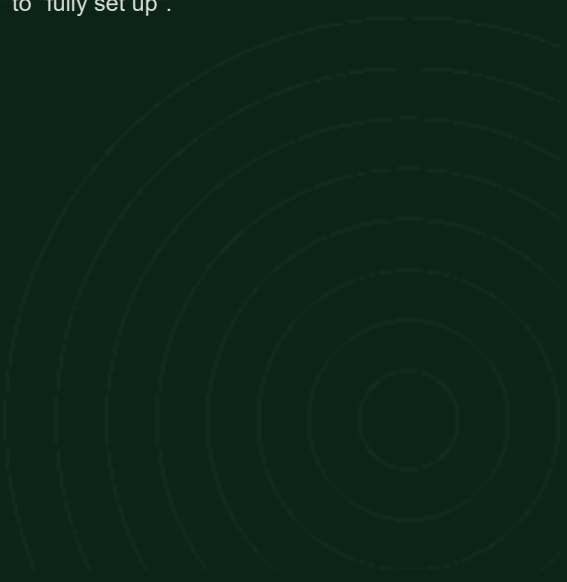

02

Getting Started in Five Minutes

You can already read most of the Hub without an account. Here is the fastest path from "just landed" to "fully set up".

IN THIS CHAPTER

- Opening the Hub on any device
 - What works without an account
 - Creating your account in five steps
 - Your first-day checklist
- 
- A decorative graphic consisting of several concentric circles, resembling a ripple effect or a target, rendered in a light gray color against the dark green background.

www.nammeshub.com.ng

 TIP

On a phone, use your browser's **Add to Home screen** option. The Hub then opens from an icon like an app, with no address bar.

What works without an account

Most of the Hub is open to everyone. You only need an account for things that are personal to you or need to be fair (one vote each, your own grades).

YOU CAN	WITHOUT AN ACCOUNT	WITH AN ACCOUNT
Read outlines, timetables, resources, events, news and opportunities	Yes	Yes
Meet the excos and send a contact message	Yes	Yes
Fill in a form	Only forms that do not ask for sign-in	Every open form
Use the CGPA calculator	No, sign-in required	Yes
Contribute a past question or notes to a course	No	Yes
Nominate or vote in the awards	No	Yes (department matric number needed)
Join a live quiz, practise or battle a friend	Yes	Yes
Sit a timed CBT practice exam	Yes	Yes
Build a quiz or exam from your own questions	Yes	Yes
Get email alerts for new News and Events	No	Yes, if you keep the setting on

Create your account in five steps

- 1 Open Sign Up.** Choose **Sign In** at the top right, then *Create an account*, or go straight to **/signup**.
- 2 Fill in the form.** Your full name, your department *matric number* (see the next chapter), your email, and a password of at least 8 characters, typed twice.
- 3 Tick "Verify you are human".** This small check stops automated bots from creating fake accounts.

- 4 **Confirm your email.** The Hub sends a confirmation email. Open it and click the link to activate your account.
- 5 **Sign in.** Return to the Hub, choose Sign In, and enter your email and password. Done!

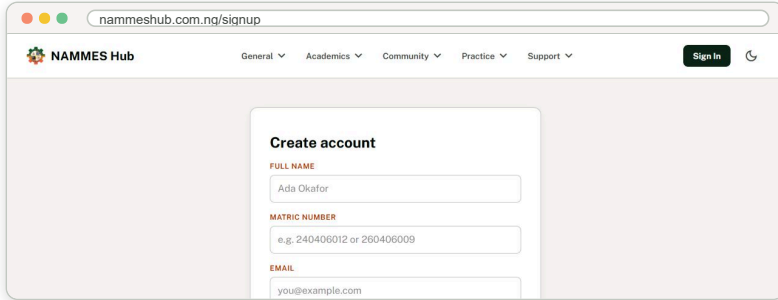

Figure 2. The Create account page. Every field is required.

Your first-day checklist

- Sign in and follow the short **welcome tour** that appears the first time.
- Open **Calendar** and check what the next few weeks hold.
- Open **Account** and set your **100 Level session** (you will need this for your CGPA report).
- Find your level in **Outlines** and **Timetable**.
- Add your first semester to the **CGPA** calculator.
- Check **Forms** for anything you need to fill in this week.
- Open **CBT practice** and sit one paper to see where you stand.
- Decide whether you want **email alerts** and set the switch on your Account page.

03

Finding Your Way Around

The five menus, the phone menu, dark mode, the footer and the little helpers that keep you oriented on every page.

IN THIS CHAPTER

- The five menus on a computer
- The menu on a phone
- Light and dark mode
- Breadcrumbs, footer and the welcome tour
- When something goes wrong: offline, maintenance, page not found

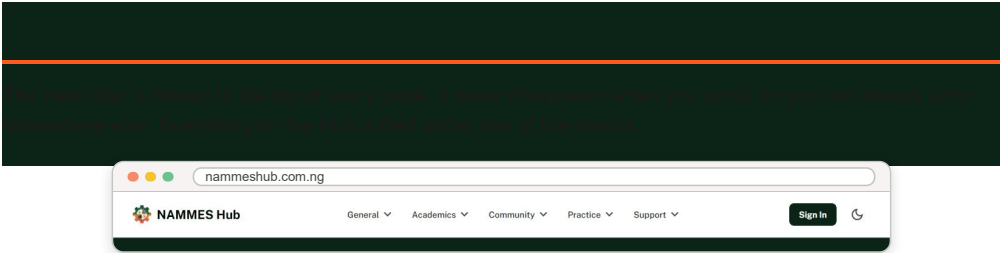

Figure 3. The menu bar. Each of the five menus opens on click.

MENU	WHAT IS IN IT
General	About NAMMES: our history, mission, vision and values.
Academics	Calendar, Outlines, Curriculum, Timetable, CGPA and Resources.
Community	Events, News, Opportunities and the Awards.
Practice	Quizzes and battles, and CBT practice. This is where anything you play or revise lives.
Support	Forms and Contact.

Click a menu name to open it, then click the page you want. Click anywhere else, or pick a page, and the menu closes. The page you are on is highlighted, so you always know where you are.

On the right there are two more controls: the **account button** (or *Sign In* when you are signed out) and the **sun / moon** button.

① **GOOD TO KNOW**

When you are signed in, the account button becomes your **account menu**, with links to your Account page and, for admins only, the Admin area, plus *Sign out*.

The menu on a phone

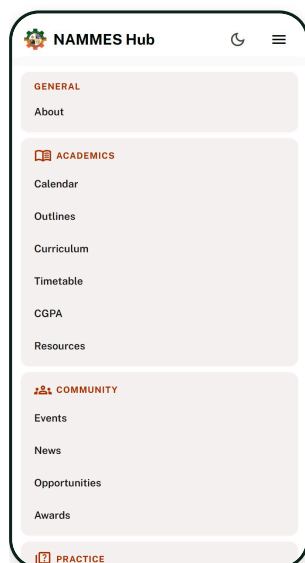

Figure 4. The phone menu: one card per menu, each with its pages listed inside.

On a narrow screen the menus collapse into the  **menu button** at the top right. Tap it and the whole map appears as a stack of **cards**, one for each menu, with an icon and every page listed underneath: *General*, *Academics*, *Community*, *Practice* and *Support*.

Below the cards is an **Account** card with your *Sign in* button, and once you are signed in, links to your Account page, the Admin area (if you are an admin) and *Sign out*.

Tap a page to go there; the menu closes by itself. You can also press **Esc** or tap the button again to close it.

TIP

The sun/moon button sits right next to the menu button, so you can switch to dark mode at night without opening the menu.

Light and dark mode

Tap the **sun / moon** button to switch between a light theme and a dark theme. The Hub remembers your choice on that device. If you have never chosen, it follows your phone or computer's own setting. Dark mode is easier on the eyes at night; light mode reads best in bright rooms and on printouts.

Breadcrumbs, footer and the welcome tour

BREADCRUMBS

On pages that go several levels deep (Outlines, Resources, Timetable, Events, News) a trail such as

Outlines  **100 Level**  **First Semester**

appears above the title. Every part of the trail is clickable, so you can step back up one level at a time.

THE FOOTER

The dark green strip at the bottom of every page has, from top to bottom: a *Reach an Exco* link, the **newsletter sign-up** (the NAMMES CommuniquÃ© on Substack), the association's **social media icons**, a short list of quick links, and the handbook download.

The footer's **Explore** column lists the same pages as the menus, so you can reach the **Calendar**, **Quizzes & battles** and **CBT practice** from the bottom of any page. The footer names them slightly differently from the menus: it says *Quizzes & battles* where the menu says *Quizzes and battles*.

THE WELCOME TOUR

The first time you sign in, a short tour introduces the **Academics** menu, the **Community** menu and your **Account** in three quick steps. It only appears once per account on each device, and *Skip* dismisses it for good.

① GOOD TO KNOW

If a small message says a new version of the site is available, choose **Refresh**. It loads the latest version so you always see current content.

When something goes wrong

Three screens stand between you and a page you were trying to read. None of them means you have done anything wrong.

NO CONNECTION

If your device cannot reach the Hub, a full-screen green page says *You're offline* and *We can't reach NAMMES Hub*, with a **Try again** button. Nothing you have saved is lost.

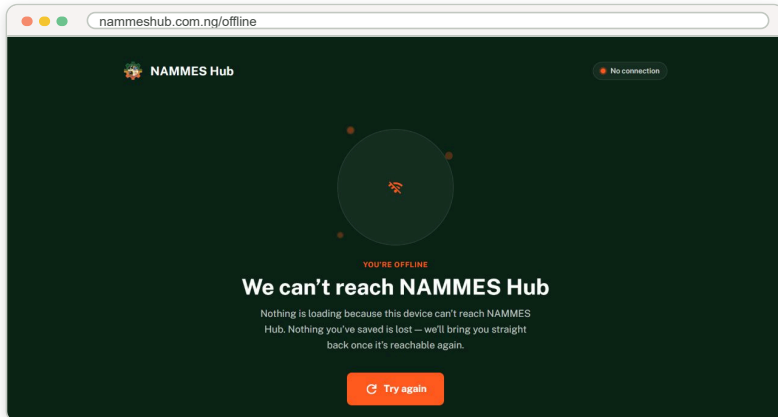

Figure 5. The offline screen. The Hub checks your connection every few seconds and brings the page back by itself.

① GOOD TO KNOW

The Hub checks whether the site is really reachable rather than trusting your device's own signal, so a dead router or a captive wifi portal is caught too. A page that is merely slow is left alone rather than replaced by this screen.

MAINTENANCE

Occasionally the executives switch the Hub into **maintenance mode** while they make big changes. Visitors then see a green *We'll be right back* page with a contact email; admins can still sign in and work.

PAGE NOT FOUND

If you type an address that does not exist you will land on a friendly *page not found* screen with a

Back to home button.

04

Your Account

Signing up, signing in, resetting a forgotten password, and the three settings on your Account page.

IN THIS CHAPTER

- Signing up and your matric number
- Signing in and forgotten passwords
- The Account page settings
- Signing out and keeping your account safe

ADDRESS nammeshub.com.ng/signup	SIGN-IN NEEDED? No, this is how you get one
FIELDS Name, matric number, email, password	TAKES About two minutes

To sign up you provide your **full name**, **matric number**, **email** and a **password** (at least 8 characters, entered twice so a typo cannot lock you out). Tick the *Verify you are human* box and choose **Create account**.

YOUR MATRIC NUMBER

The Hub asks for your **department matric number**. It follows the pattern **YY0406XXX**: two digits for your entry year, then **0406** (the department code), then three digits. For example, **240406012** or **260406009**.

Your matric number is what proves you are a real member of the department. It is used, for example, to make sure the awards stay fair: one member, one vote.

⚠ CAREFUL

Your matric number is saved once, at sign-up, and you **cannot change it yourself** afterwards. Double-check it before you submit. If a typo slips through, contact an executive through the Contact page so an admin can correct it.

After you submit, the Hub emails you a link to **confirm your address**. Your account is only active once you have clicked it, so check your spam folder if it does not arrive within a few minutes.

Signing in and forgotten passwords

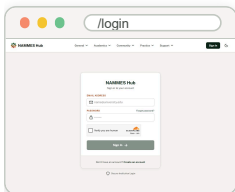

Figure 6. The Sign In page.

- 1 Choose **Sign In** in the menu.
- 2 Enter your **email** and **password**.
- 3 Tick *Verify you are human*.
- 4 Choose **Sign In**.

IF YOU FORGET YOUR PASSWORD

- 1 On the Sign In page choose **Forgot password?** (next to the password box).
- 2 Type the email you signed up with and submit. The Hub emails you a reset link.
- 3 Open the email, click the link, and choose a **new password** of at least 8 characters.
- 4 You are sent back to Sign In with a confirmation. Sign in with the new password.

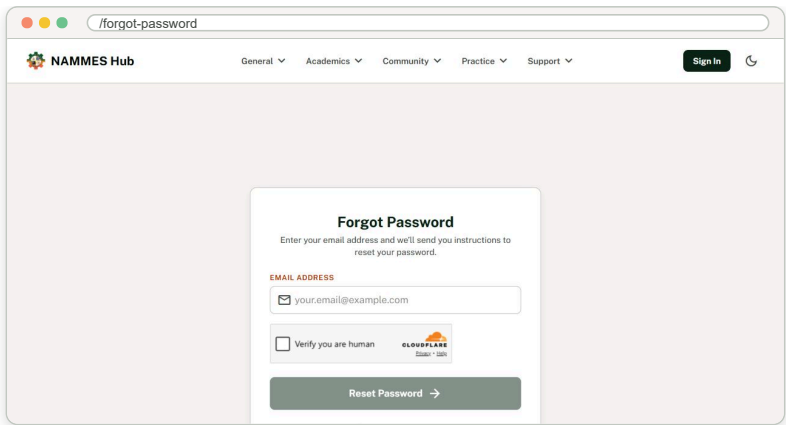

Figure 7. The Forgot password page. You need only the email you signed up with.

① GOOD TO KNOW

The reset link works once and expires. If it has gone stale, ask for another from the same page rather than searching your inbox for the old one.

① GOOD TO KNOW

Admins who have switched on two-factor login are also asked for a 6-digit code from their authenticator app after their password. See Chapter 27.

The Account page settings

Once signed in, open your account menu and choose **Account** (or go to </account>). It shows the email you signed up with and three settings:

SETTING	WHAT IT DOES	WHEN TO CHANGE IT
Full name	Shown on your CGPA report and to admins.	If you signed up with a nickname or misspelled your name.
100 Level session	The year you started 100 Level. It lets the CGPA report label every level with the right academic session. Starting in 2024 means 100L is 2024/2025, 200L is 2025/2026, and so on.	Once, right after you sign up.
Email notifications	A single switch. On means you receive alerts about new News and Events and department broadcasts from the executives.	Any time you want fewer (or more) emails.

🔍 TIP

Turn **email notifications** on if you never want to miss an exam notice or event. You can switch them off again at any time from the same page.

Signing out and keeping your account safe

Open the account menu and choose **Sign out**. Always sign out on a shared or public computer. Because the Hub holds your grades, never share your password, and use one that you do not reuse on other sites.

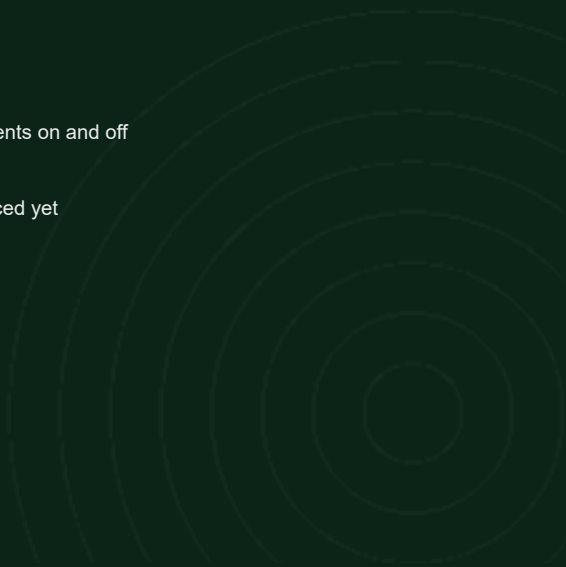

05

The Academic Calendar

Lecture, examination and registration dates from the senate, in the same grid as departmental events, so you can see the whole term at a glance.

IN THIS CHAPTER

- Month and agenda views
- Switching academic dates and events on and off
- What is coming up next
- Dates that have not been announced yet

ADDRESS nammeshub.com.ng/calendar	SIGN-IN NEEDED? No
WHO IT IS FOR Every student	BEST FOR Planning a term around exams, registration and events

The academic calendar is the one page that answers “*when is everything?*”. It brings together the dates the department’s senate has approved — lectures, examinations, registration, breaks, convocation — and the **departmental events** the association publishes, in a single grid you can browse by month or read as a list.

You will find it at **Academics → Calendar**, at the top of the Academics menu, and under *Explore* in the footer.

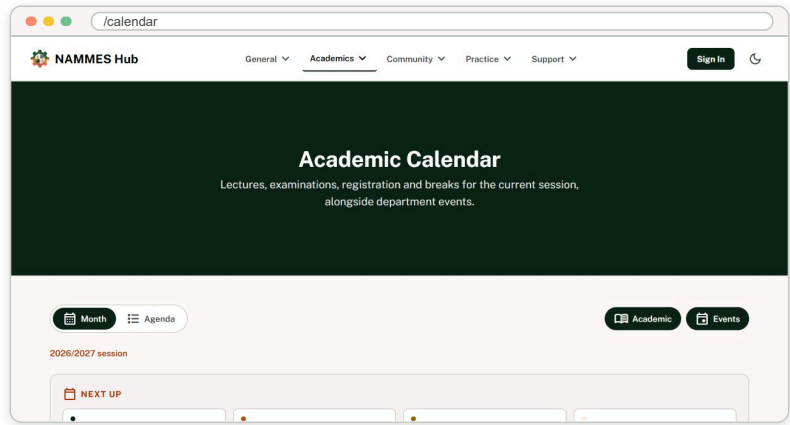

Figure 8. The calendar in Month view. The session label above the grid tells you which one you are looking at.

Month and agenda

Two ways to read the same dates, switched by the **Month** and **Agenda** buttons at the top of the page.

VIEW	WHAT IT IS FOR
Month	The whole month as a grid, so you can see how an exam week clusters and when a break falls. Use the arrows to move between months, or Today to jump back.
Agenda	A plain list, soonest first. Better for reading on a phone, and better when you only care about what is next.

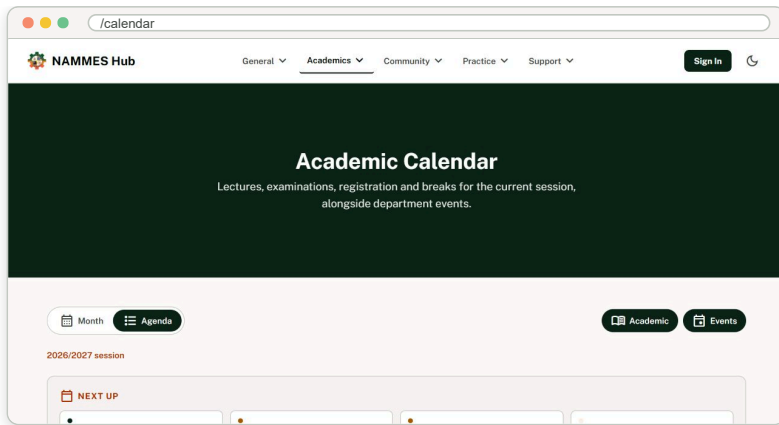

Figure 9. Agenda view: a list rather than a grid.

① GOOD TO KNOW

On a phone the calendar always opens in **agenda**, whatever the executives have set as the default for computers. A month grid on a small screen is mostly empty space.

Academic dates or events, or both

Two filter pills sit above the grid: **Academic** for the senate's dates and **Events** for departmental programmes, seminars and socials. Both are on by default, and you can switch either off to concentrate on one.

Each kind of item has its own colour and icon, so a three-week exam period reads at a glance rather than as a wall of text.

① GOOD TO KNOW

If you switch both off the page says *No sources selected* rather than showing an empty calendar, so an empty month always means something: either nothing is scheduled, or you have filtered it out.

What is coming up

A **Next up** strip above the grid lists the next few items so you do not have to hunt for them. Each is labelled *Happening now*, *Today*, or with its date, and an item that runs for more than one day also says **Ends** with its final day. Departmental events in the strip link to their own page.

Dates that have not been announced

The senate approves some items well after the session begins, and the Hub never invents a date it has not been given. Anything without a date is collected in a **Dates to be announced** panel instead of the grid, with a line explaining that no date has been set yet. When the executives publish the date, the item moves onto the calendar on its own.

① GOOD TO KNOW

An item with no date is not missing and not cancelled. It is simply not on the grid yet.

Reading the grid

- The **session label** above the grid, such as *2026/2027 session*, tells you which academic session the dates belong to.
- A day with more items than fit shows **+N more**. Tap it to see the rest.
- **Ring today's date** draws a ring around the current day so you cannot lose your place.
- An empty month says *Nothing scheduled in [month]*. A month hidden by your filters says *This month is filtered out* — two different sentences for two different reasons.

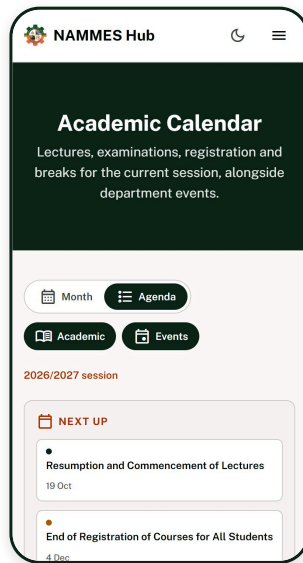

Figure 10. The calendar on a phone, in agenda view.

Email reminders

Executives can set a reminder for each date — seven days before an exam, one day before registration reopens, and so on. If you have **email notifications** switched on in your Account settings, the Hub emails you that many days beforehand. Nothing is sent for an item with no date set, and every reminder is sent once per date.

👤 TIP

The calendar is the fastest way to answer "when is the next thing?" — it replaces the screenshots of the senate calendar that used to circulate in group chats. If you still have one, the Hub has the same dates and the executives can update them in seconds rather than by reposting a flyer.

① **GOOD TO KNOW**

Senate dates are stored as plain calendar dates, not times. Every senate item is an all-day entry, so an exam week never shifts to the wrong day because of a time zone. Departmental events, which can genuinely start at 3pm, do carry a time.

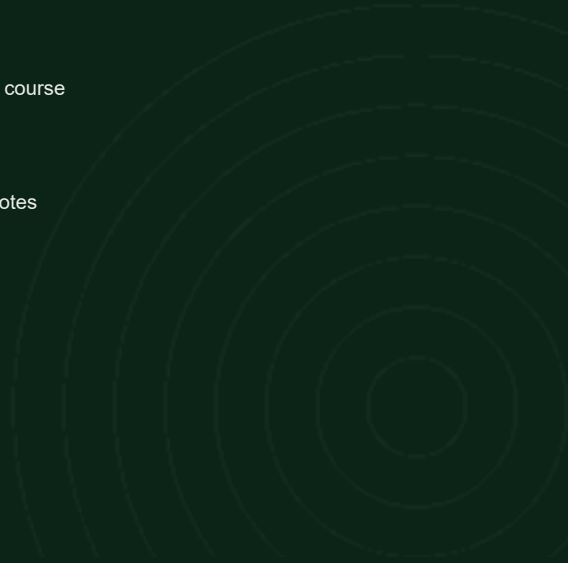

06

Course Outlines

A one-page briefing for every course in the department: what it covers, how many units it carries, who teaches it and where to find past questions.

IN THIS CHAPTER

- Finding a course: level, semester, course
- Reading a course outline
- Downloading outlines as PDF
- Contributing past questions and notes

ADDRESS nammeshub.com.ng/outlines	SIGN-IN NEEDED? No (only to contribute)
WHO IT IS FOR Every student, 100 to 500 Level	BEST FOR Planning your semester before lectures begin

A course outline answers the question “*what am I actually going to study in this course?*” in one page. Instead of hunting through old chats for a photo of a handout, you open the Hub, pick your level and semester, and read the outline for each course.

① **GOOD TO KNOW**

An outline tells you what a course covers. To find out *when* the examinations are, see **Chapter 5, The Academic Calendar**.

Finding a course

Outlines are organised as a three-step drill-down: **level**, then **semester**, then **course**.

Pick a level (100–500) Pick a semester Pick a course Read the outline

- 1 Open **Academics** & **Outlines** and choose your level under *Select Level*.
- 2 Choose **First Semester** or **Second Semester**.
- 3 A table lists every course with its **code**, **title**, **units** and a **status**: **C** means compulsory and **E** means elective, so you can tell which courses you must take. Type in the *search box* to filter by code or title.
- 4 Choose **View outline** next to the course you want.

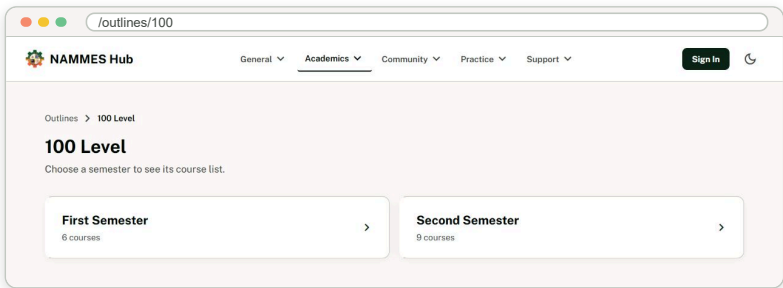

Figure 11. After choosing a level, pick a semester to see its course list.

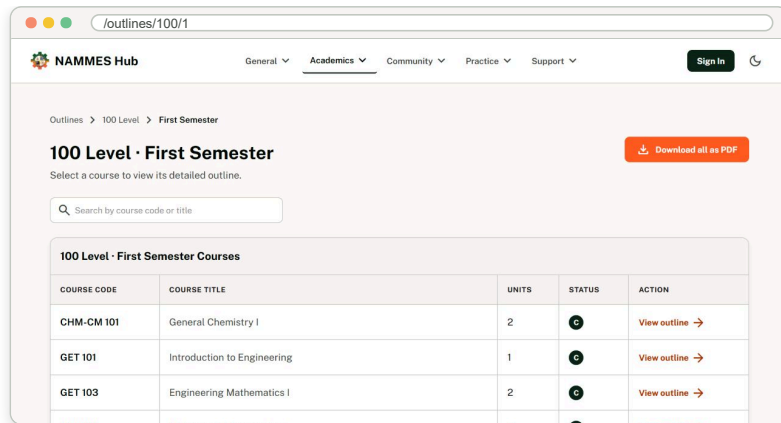

Figure 12. The course list for 100 Level, First Semester, with search and a PDF download button.

Reading a course outline

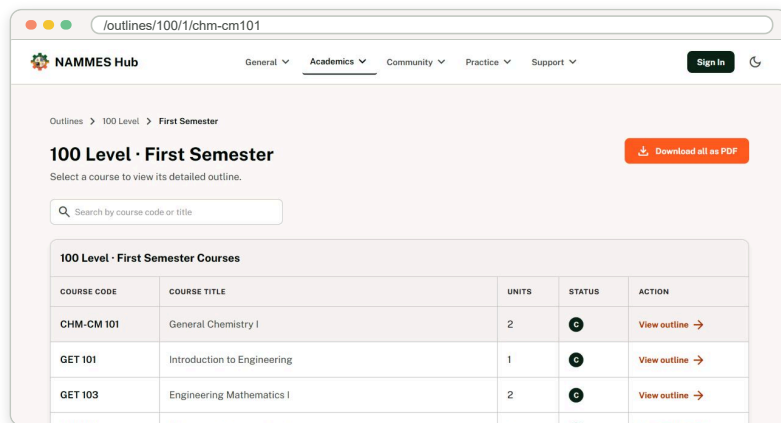

Figure 13. A course outline page: units, lecturer, description and the topics covered.

Every outline page has the same layout:

SECTION	WHAT YOU GET
Header	The course code , units and whether it is compulsory or an elective , the full title , the lecturer (or TBA) and the date the outline was last updated .
Description	A short plain-language summary of the course.
Topics covered	A bullet list of everything the course is expected to teach.
Recommended texts	Textbooks to look for. When a title includes a web address, it becomes a clickable link.
Downloads	Links to past exam questions and lecturer notes , when the executives have added them.

SECTION	WHAT YOU GET
Community contributions	Past questions and notes shared by other students, grouped by type.

 TIP

An outline's "Updated" date tells you how fresh the information is. If your lecturer changes the scheme, tell the executives so the outline can be corrected.

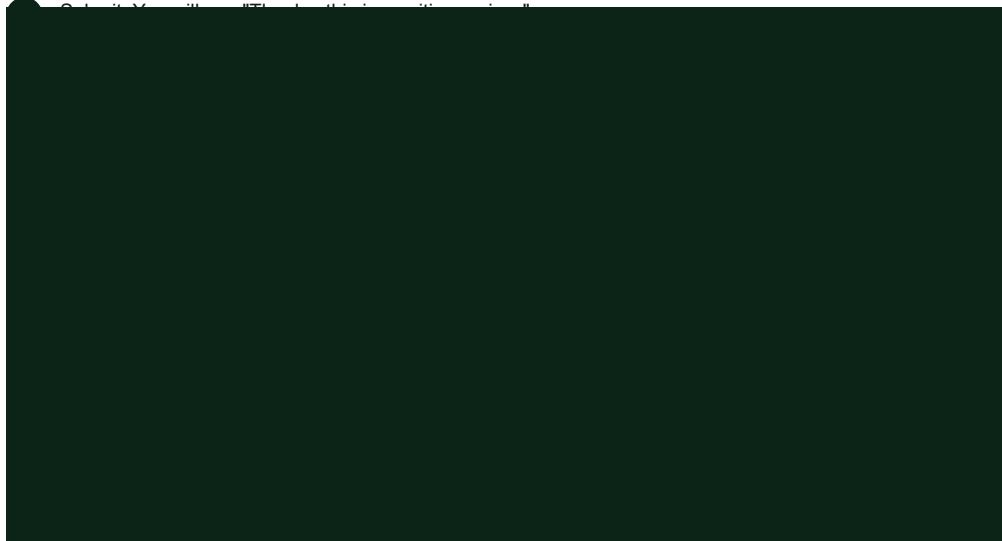

Downloading outlines as PDF

You can keep outlines offline. On a single course page choose [Download PDF](#) for that course. On a semester's course list choose [Download all as PDF](#) to get every course in the semester in one neat file, handy for printing or sharing with a coursemate.

Contributing past questions and notes

At the bottom of every outline is a **Community contributions** box. If you are signed in you can add something for the next class to use:

- 1 Choose [Contribute](#).
- 2 Pick a **Type**: *Past Question*, *Lecture Notes* or *Other*.
- 3 Optionally add the **session** (for example **2023/2024**) and give it a clear **title** such as "2023 second semester exam".
- 4 Either **upload a file** (PDF, JPG or PNG, up to 10 MB) or **paste a link**, for example to a Drive folder.

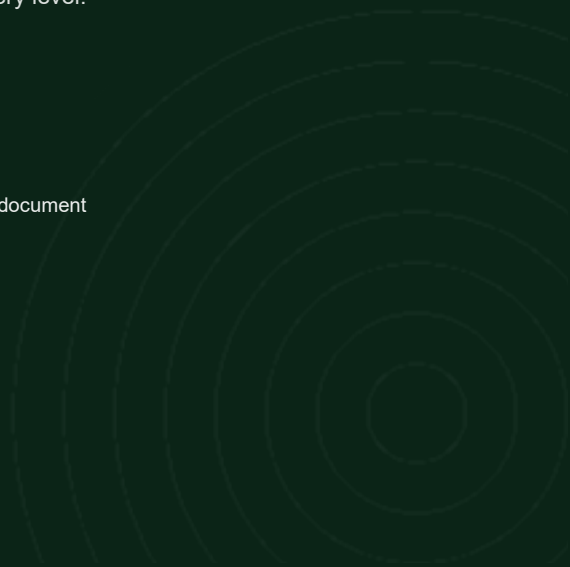

07

The Programme Curriculum

The official national blueprint for your degree: the CCMAS document, with unit totals for every level.

IN THIS CHAPTER

- What CCMAS is
- Units per level
- Viewing and downloading the full document

ADDRESS nammeshub.com.ng/curriculum	SIGN-IN NEEDED? No
WHO IT IS FOR Everyone, especially new students	BEST FOR Seeing the whole degree at a glance

CCMAS stands for the **Core Curriculum and Minimum Academic Standards**, issued by the National Universities Commission (NUC). The Curriculum page presents the official document for the **B.Eng. in Materials and Metallurgical Engineering**.

The programme covers a broad field, shown on the page as five disciplines:

Fifteen (15) credit units are attached to the **Students Industrial Work Experience Scheme (SIWES)**, which guarantees real industrial training. All 15 SIWES units are credited in the second semester of 400 Level.

Units per level

LEVEL	TOTAL UNITS
100 Level	25 units
200 Level	29 units
300 Level	27 units
400 Level	8 units
500 Level	16 units
Total	105 units

The full document

Scroll down and you will find the whole CCMAS PDF, with **course codes, units, contact hours, learning outcomes and detailed content** for every course at every level. On a computer it previews right on the page; on a phone, or if the preview does not show, use *Open the PDF in a new tab*. To keep a copy, choose

[Download CCMAS PDF](#)

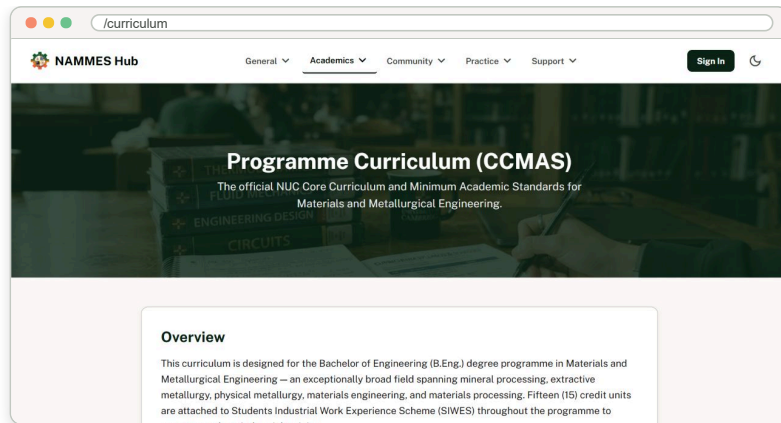

Figure 14. The Curriculum page with its overview and discipline tags.

💡 TIP

Curriculum answers "what does the whole degree look like?". Outlines answer "what will I study in this one course?". Use them together.

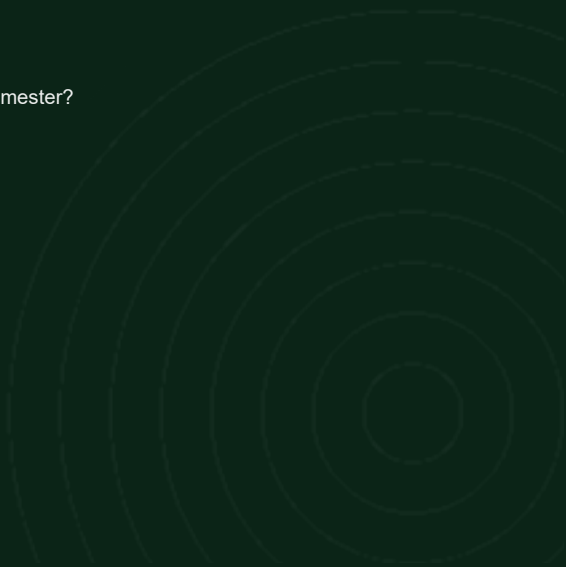

08

The Timetable

Your class schedule and exam schedule for every level, filterable by day, and downloadable.

IN THIS CHAPTER

- Choosing your level
- Class or exam? First or second semester?
- Filtering by day
- Downloading a PDF or image

ADDRESS nammeshub.com.ng/timetable	SIGN-IN NEEDED? No
WHO IT IS FOR Every student	BEST FOR Planning your week and exam period

Open **Academics** â†’ **Timetable** and pick your level. The page for that level always follows the same simple controls.

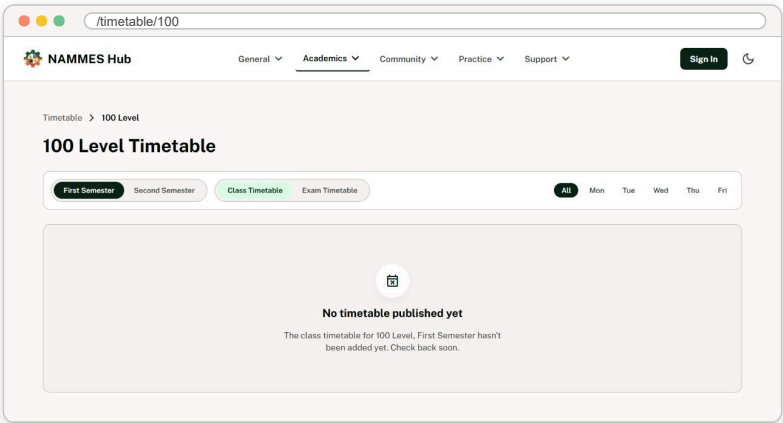

Figure 15. The timetable controls: semester, class or exam, and a day filter. This example is a level with nothing published yet.

The three controls

CONTROL	OPTIONS	WHAT IT DOES
Semester	First Semester Â· Second Semester	Switches between the two semesters of the session.
Type	Class Timetable Â· Exam Timetable	Shows weekly lectures, or the dated exam schedule.
Day	All Â· Mon Â· Tue Â· Wed Â· Thu Â· Fri	Narrows the <i>class</i> timetable to a single day of the week. It is hidden on the exam timetable.

The schedule is a table. Each row shows the **time** (start to end), the **course code and title**, the **venue**, and, where it applies, the **lecturer** and a short note such as *Practical Lab* or *Tutorial*. Class rows are sorted by day and time; the exam timetable is sorted by exam date.

① **GOOD TO KNOW**

If you see *"No timetable published yet"*, the executives simply have not added it. Check back soon. If a day has no lectures you will see *"No entries for this day"*.

① **GOOD TO KNOW**

The timetable tells you the *time* of each exam. The **academic calendar** tells you the *days* the examination period runs, alongside registration and lectures. See **Chapter 5**.

Taking your timetable with you

Once a timetable has entries, two download buttons appear beside the page title:

FORMAT

Download PDF

A print-ready document. Best for pinning up, printing, or sending in a document chat.

FORMAT

Download Image

A picture of the timetable. Best for setting as a phone wallpaper or posting in a status.

💡 **TIP**

Download the **image** version and set it as your lock-screen wallpaper. You will always know where your next class is without opening anything.

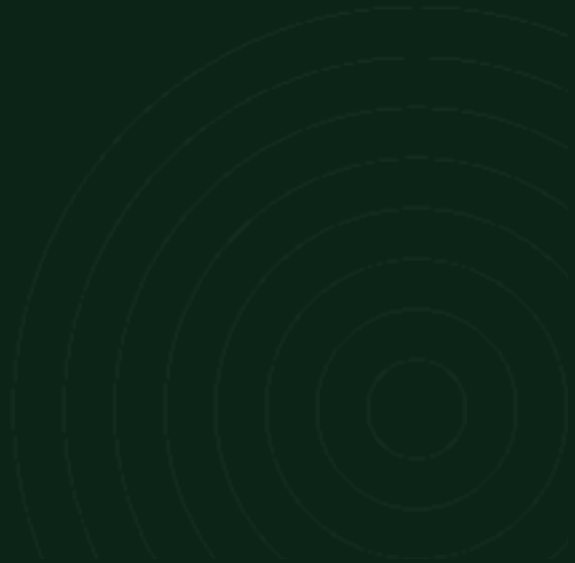

09

The CGPA Calculator

A private grade book that works out every semester's GPA and your cumulative CGPA, shows the trend, and tells you what you need next.

IN THIS CHAPTER

- How CGPA is worked out
- Adding semesters and courses
- Your CGPA card and trend chart
- Repeated courses
- "What grade do I need?"
- Downloading your report

ADDRESS nammeshub.com.ng/cgpa	SIGN-IN NEEDED? Yes, so your grades follow you across devices
WHO IT IS FOR Every student	BEST FOR Tracking progress and setting targets

Your grades are saved to your account, so they are there whichever phone or computer you sign in on. The calculator uses the standard **5-point scale**:

GRADE	A	B	C	D	E	F
Points	5	4	3	2	1	0

GPA for a semester = total points ÷ total units, where each course's points are its grade points ÷ its units.
CGPA is the same calculation across every semester together. Your CGPA is then matched to a class of degree:

CGPA	CLASSIFICATION
4.50 ÷ 5.00	First Class
3.50 ÷ 4.49	Second Class Upper
2.40 ÷ 3.49	Second Class Lower
1.50 ÷ 2.39	Third Class
1.00 ÷ 1.49	Pass
Below 1.00	Below Pass

Adding semesters and courses

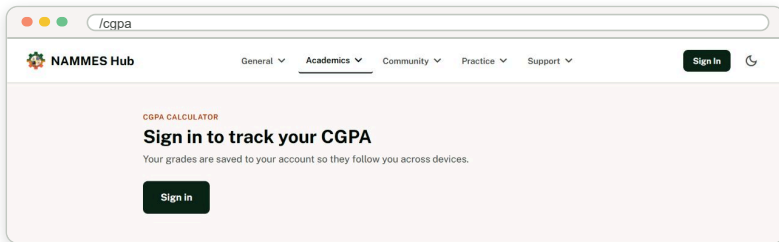

Figure 16. Signed-out visitors see this. Sign in to open your academic record.

- 1 Add a semester.** At the bottom of the page pick the *Level* and *Semester* (1 or 2) and choose **Add semester**. The same semester cannot be added twice.
- 2 Add courses.** Inside each semester card fill in the *Code* (for example MME 301), an optional *Title*, the *Units*, the *Grade* (A to F) and the *Type* (compulsory or elective), then choose **Add course**.

- 3** **Fix mistakes.** Every course row has **Edit** and **Delete**; a whole semester can be taken out with **Remove semester**.

Your CGPA card and trend chart

At the top of the page a large green card shows your **cumulative GPA**, a badge with your **classification** and the number of **units completed**. Each semester card also shows its own GPA. Once you have added **two or more semesters**, a **trend chart** appears so you can see, at a glance, whether you are climbing, holding steady, or slipping.

Repeated courses

If you type a course code you have taken in an earlier semester, the calculator notices and shows a box: "*You've taken this course before*", with the earlier grade. You choose whether the earlier attempt still counts: **Exclude that attempt from CGPA** or **Include in CGPA**. Excluded attempts are marked so you never forget which one you dropped.

"What grade do I need?"

The orange box at the bottom is a goal planner. Enter a **Target CGPA** (say **4.50**) and the **Remaining units** you still have to take. It tells you the **average grade point you must average** on those units, or warns you when the target is *not achievable* even with straight A's, or tells you the target is already met.

Q TIP

Use it early. Knowing you need an average of 4.6 over your last 60 units is far more useful in 200 Level than in 500 Level.

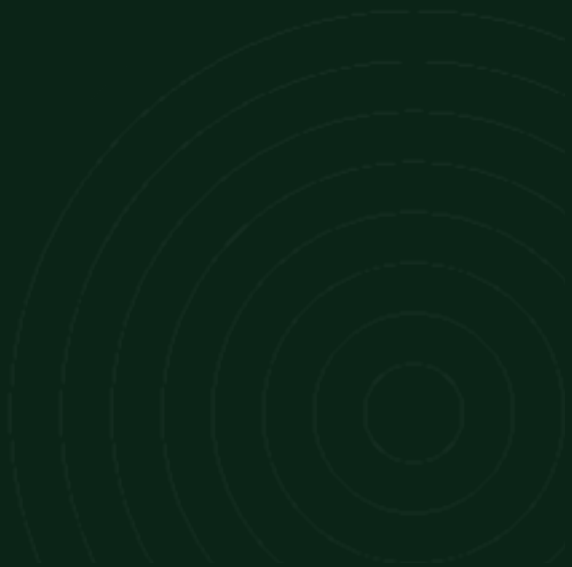

10

Resources

A shelf of shared study materials, organised by level and semester, opening straight into the executives' Drive folders.

IN THIS CHAPTER

- Browsing resources
- What you will find
- Using Drive links politely

ADDRESS nammeshub.com.ng/resources	SIGN-IN NEEDED? No
WHO IT IS FOR Every student	BEST FOR Slides, notes and shared study folders

Resources follows the same path as outlines: choose your **level**, then a **semester**, and you land on a table of everything published for that semester.

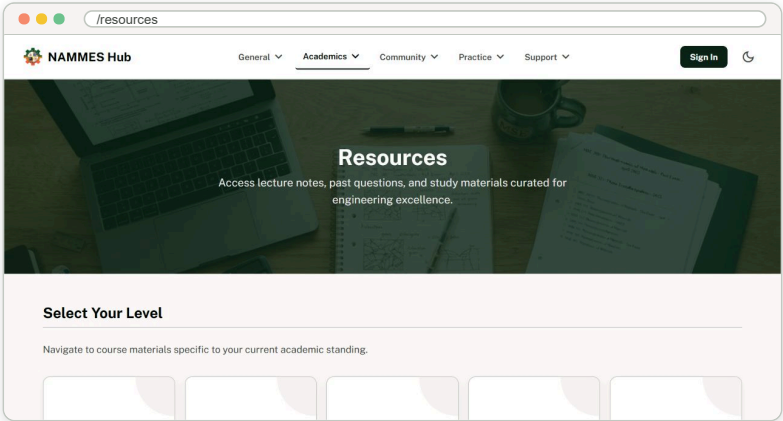

Figure 17. Choose your level to begin.

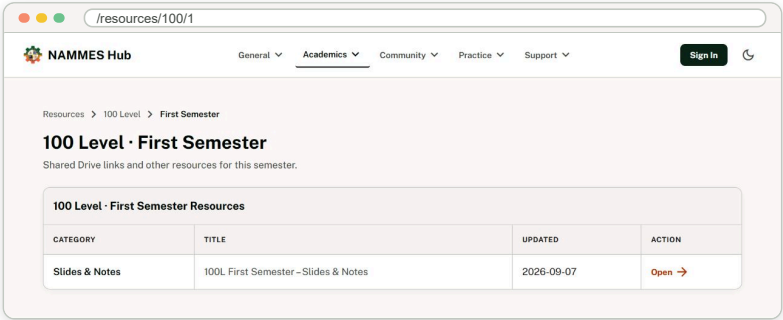

Figure 18. Each row shows a category, a title, when it was updated, and an Open link.

What you will find

COLUMN	MEANING
Category	The kind of material, for example <i>Slides & Notes</i> .
Title	A clear name, such as "100L First Semester – Slides & Notes".

COLUMN	MEANING
Updated	When the executives last refreshed the link.
Action	Open takes you to the shared Google Drive folder or file.

If a level and semester show *"No resources published yet"*, nothing has been added for it so far.

Using Drive links politely

- Links open in a new tab on Google Drive. You may need to sign in to Google.
- Download what you need, but please do not delete, rename or move files in shared folders.
- Found something wrong or out of date? Tell an executive via the Contact page.
- Have material to share? Contribute it through the relevant course outline (Chapter 5), where it is reviewed before publishing.

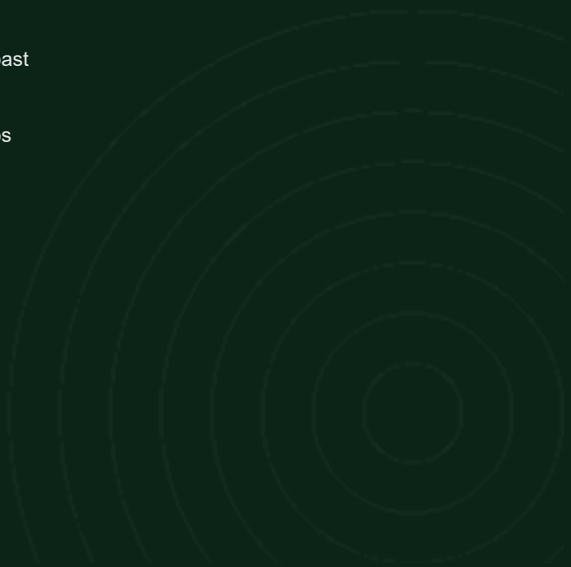

11

Events

Workshops, seminars and gatherings, with a photo gallery for every event once it has happened.

IN THIS CHAPTER

- The Events page: upcoming and past
- An event's detail page
- Browsing and saving gallery photos

ADDRESS nammeshub.com.ng/events	SIGN-IN NEEDED? No
WHO IT IS FOR Everyone	BEST FOR Never missing a programme; reliving the ones you did

The Events page splits everything into two lists: **Upcoming Events** (still ahead) and **Past Events** (already happened, newest first). Each event is a card with its **flyer or photo**, its **date**, its **title** and a short **description**. A short preview of events also appears on the home page.

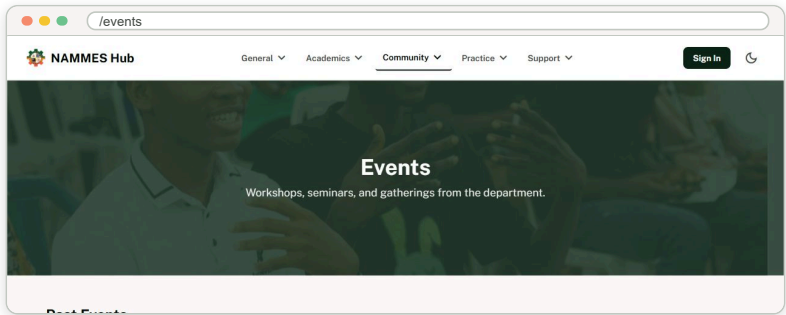

Figure 19. The Events page. Past events show below the upcoming ones.

① **GOOD TO KNOW**

The Hub decides "upcoming" or "past" from the event's date, so an event moves down to Past Events automatically once its day has gone by.

① **GOOD TO KNOW**

Departmental events also appear on the **academic calendar** alongside senate dates, so one grid shows both. See **Chapter 5**.

An event's detail page

Choose an event card to open its page. It has two tabs:

TAB	WHAT IS INSIDE
Details	The full flyer, the date, the time and location line (when given) and the complete description. Web addresses in the text are clickable.
Gallery	A grid of photos from the event. The tab title shows how many photos there are, for example <i>Gallery (295)</i> . Until photos are uploaded it reads <i>"No photos yet"</i> .

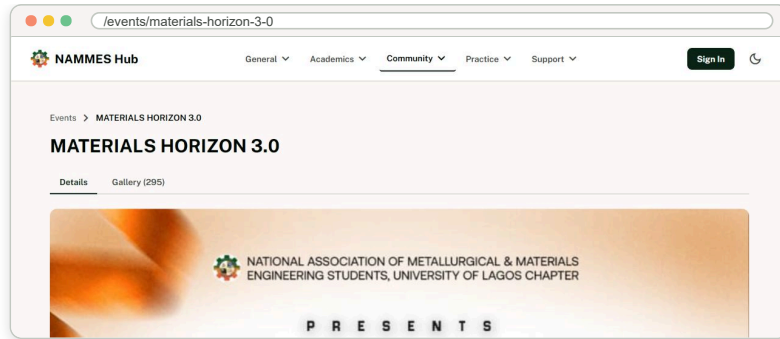

Figure 20. The event page: Details and Gallery tabs sit under the title.

Browsing and saving photos

- 1 Open an event and choose the **Gallery** tab.
- 2 Tap any photo to open it large in the **lightbox**.
- 3 Move to the next or previous photo by **swiping** on a phone, or with the on-screen and keyboard arrow keys on a computer. Press **Esc** to close.
- 4 Choose the **download** button in the corner to save the photo to your device.

TIP

Looking for a registration link? Executives often attach a **form** to an event. Check the description, or open the **Forms** page (Chapter 15).

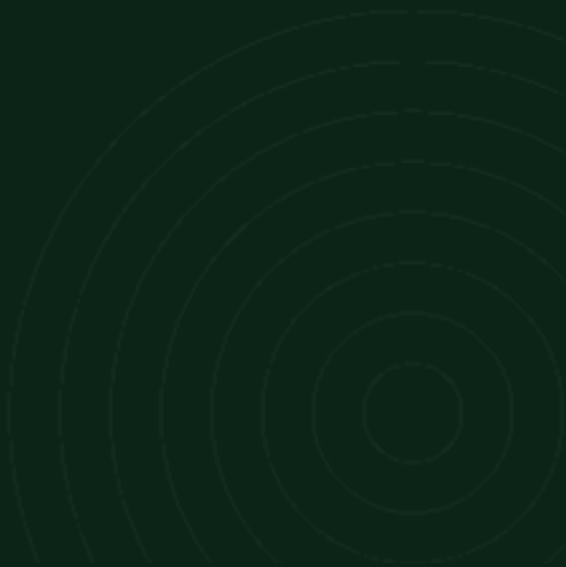

12

Department News

Announcements from the executives, organised by category so you can read only what matters to you.

IN THIS CHAPTER

- The News page and its filters
- Categories explained
- Reading a story
- Getting news by email

ADDRESS nammeshub.com.ng/news	SIGN-IN NEEDED? No
WHO IT IS FOR Everyone	BEST FOR Official announcements, jointly posted with the PRO

The newest story appears first as a large **featured** card; the rest follow underneath in a grid. Each card has a photo, a category, a headline and the opening lines. A small coloured **badge** such as New or Updated shows which stories are fresh.

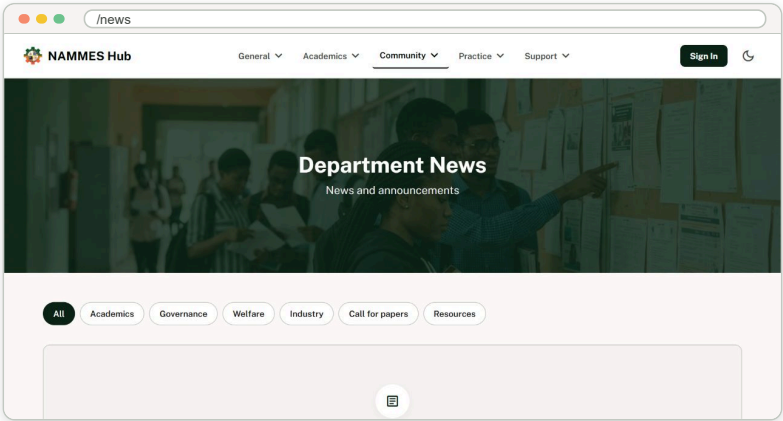

Figure 21. The News page with its category filter chips.

Categories explained

Use the chips above the stories to filter. Choose *All* to see everything again.

CATEGORY	TYPICAL STORIES
Academics	Lecture changes, exam notices, course updates.
Governance	Executive decisions, elections, general meetings.
Welfare	Support for members and welfare programmes.
Industry	Plant visits, company partnerships, career talks.
Call for papers	Conference and journal calls for student authors.
Resources	New study materials and how to get them.

A category filter is kept in the web address (for example `/news?category=Welfare`), so you can share a filtered view with a friend.

Reading a story

Choose a card, or *Read more*, to open the full article with its category, badge, headline, date and author. Use the trail above the headline to come back to the News page.

Getting news by email

You do not have to keep checking the page. There are two ways to have news come to you:

- **Email notifications:** with the switch on in your Account page, new News and Events alerts land in your inbox (Chapter 4).
- **The newsletter:** type your email into the *Stay Connected With Us* box in the footer to subscribe to the NAMMES CommuniquÃ© on Substack.

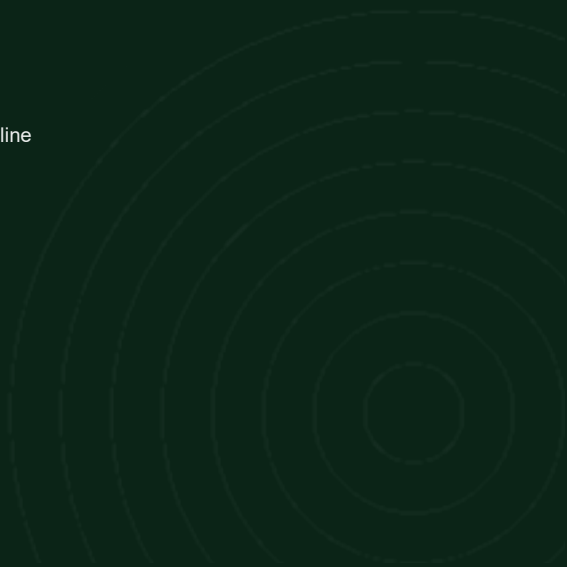

13

Opportunities

Scholarships and internships that are worth applying for, sorted by the ones closing soonest.

IN THIS CHAPTER

- How the list is sorted
- Reading a row
- Applying without missing the deadline

ADDRESS nammeshub.com.ng/opportunities	SIGN-IN NEEDED? No
WHO IT IS FOR Every student, especially finalists	BEST FOR Scholarships, internships, research roles

Opportunities is one clean table under the heading **Current listings**. It is **sorted by the soonest deadline first**, so the most urgent item is always at the top.

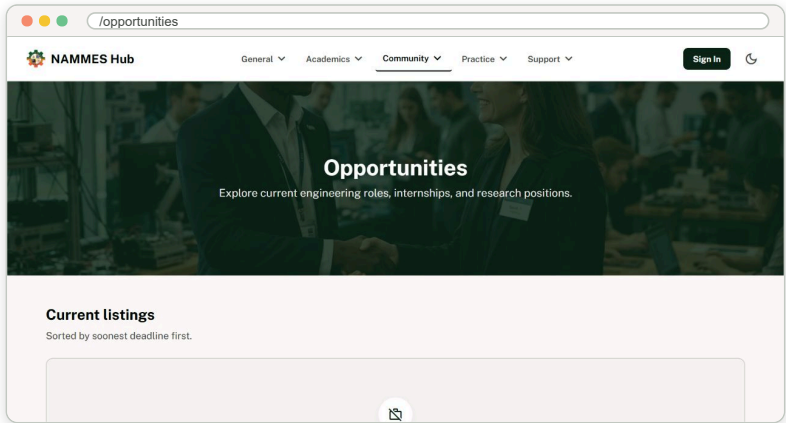

Figure 22. The Opportunities page. Listings appear as soon as the executives publish them.

Reading a row

COLUMN	WHAT IT TELLS YOU
Deadline	The last day to apply.
Type	A <i>Scholarship</i> or an <i>Internship</i> .
Title & Org	What the opportunity is and which organisation is offering it.
Apply	A link that takes you to the organisation's own application page.

Applying without missing the deadline

- 1 Check the **deadline** first. Nothing else matters if it has already passed.
- 2 Choose **Apply**. You go to the organisation's site, since applications are handled by them, not by NAMMES.
- 3 Prepare documents early (CV, transcript, references) and apply well before the closing day.

 TIP

Turn on **email notifications** in your Account page, and executives can also send a broadcast the moment something important is posted.

 CAREFUL

NAMMES lists opportunities to help you find them. It does not run the applications and cannot guarantee any outcome. Always read the offer carefully and never pay anyone to "secure" a place.

14

The Awards

The department's annual poll: members nominate, the executives shortlist, everyone votes once, and the winners are revealed.

IN THIS CHAPTER

- The five stages of an awards season
- Nominating
- Voting
- Results
- Who can take part

ADDRESS nammeshub.com.ng/awards	SIGN-IN NEEDED? Yes, to take part
WHO IT IS FOR Members with a department matric number	BEST FOR Celebrating your peers

The Awards page always shows the **current stage** of the season, and every stage looks different. A season moves through five stages, in order, controlled by the executives:

1 Â• Nominating You suggest names	2 Â• Curating Shortlist built	3 Â• Voting You vote once	4 Â• Closed Votes counted	5 Â• Revealed Winners shown
---	---	-------------------------------------	-------------------------------------	---------------------------------------

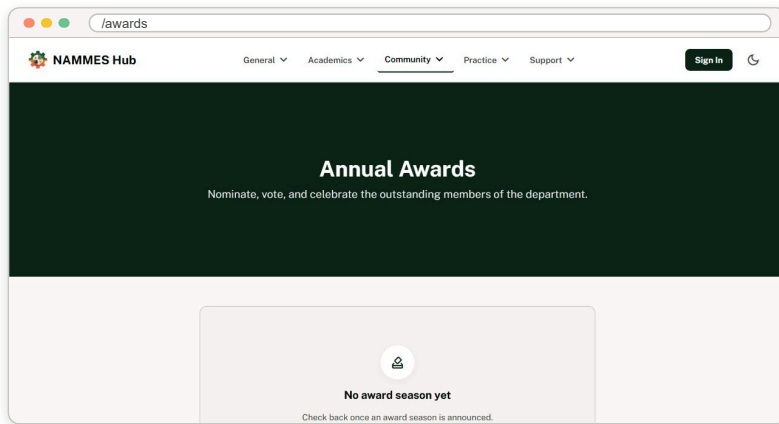

Figure 23. When no season is running, the page says so. The screen changes at every stage.

Stage 1: Nominating

Each award category is shown with a box where you type the name of the person you would nominate and **upload a photo of your nominee** (a clear headshot is preferred; JPEG or PNG, up to 5 MB). A counter tells you how many categories you have answered (for example *3 of 8*).

- 1 Sign in and open **Awards**.
- 2 For each category you care about, type your nominee's name and upload their photo. A category counts as answered once it has both. You do not have to answer every category.
- 3 Choose **Save nominations**. You will see "Nominations saved, thank you!"
- 4 Changed your mind? Come back and edit. **You can change your nominees until nominations close.**

Stage 2: Curating

Nominations are closed. The page shows *"Nominations closed: the shortlist is being finalized, voting opens soon."* Behind the scenes the executives are turning your raw suggestions into a fair shortlist for each category, sometimes with nominee photos.

Stage 3: Voting

The ballot shows every category with its shortlisted nominees and their photos. Each nominee has a **share** option that makes a picture card you can post to encourage others to vote. A green banner confirms that your **matric number is verified** and reminds you there is **one vote per student**.

- 1 Pick **one nominee per category**.
- 2 Review your choices.
- 3 Choose **Submit ballot** to send the whole ballot at once.
- 4 After voting you will see *"You've already voted"* and cannot vote again.

CAREFUL

A submitted ballot is final. Take a moment to check every choice before you press **Submit ballot**.

Stages 4 and 5: Closed and Revealed

When voting ends the page says *"Voting closed: results will be announced soon."* Once the executives reveal the results, the page turns into a results board titled *Results revealed* with the **winner and vote tally** for each category and the number of ballots cast. Each category also has a **winner card** that you can download as an

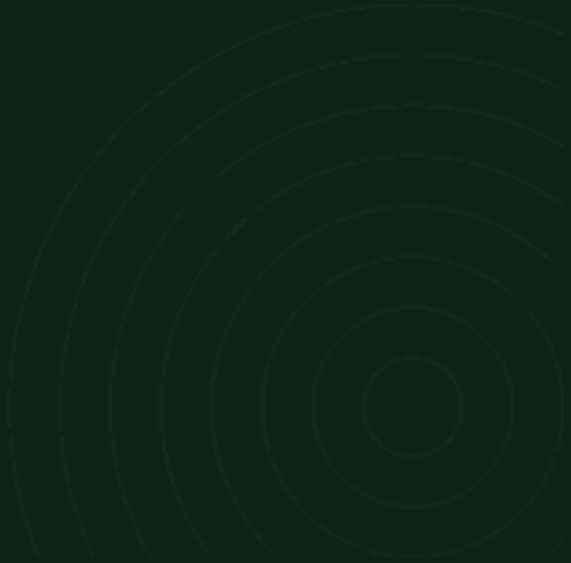

15

Forms

Event registrations, surveys and applications, all in one place, each styled by the executives who made it.

IN THIS CHAPTER

- The Forms page
- Filling in a form
- Closed forms, sign-in and editing
- Using a shared link or QR code

ADDRESS nammeshub.com.ng/forms	SIGN-IN NEEDED? Depends on the form
WHO IT IS FOR Everyone invited to respond	BEST FOR RSVPs, surveys, applications

The Forms page lists every form that is **currently accepting responses**. Across the top are three numbers: how many forms are *open now*, the *responses so far*, and the *next deadline*. Each form appears as a card with a **category badge** (**Event**, **Application**, Survey or Other), a title, a short description, and a **Fill form** button.

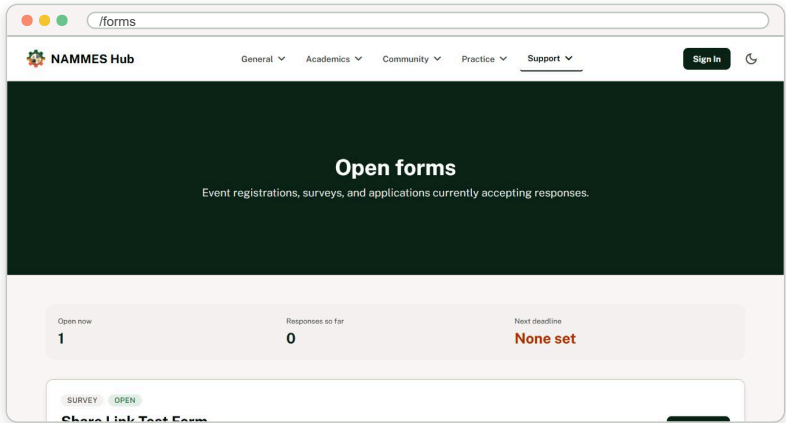

Figure 24. The Forms page, with the open-form counts across the top.

The page says "No open forms right now" when nothing is open. Check back later.

① GOOD TO KNOW

The Forms page also has a banner of its own, which the executives can reword or replace with pictures without touching the page below it.

Filling in a form

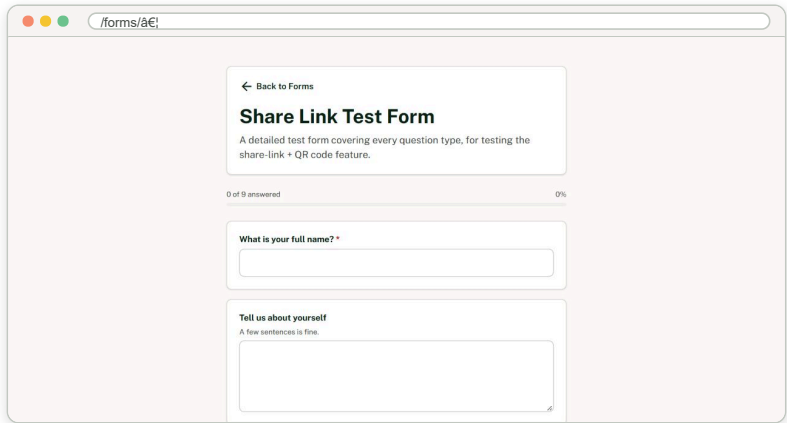

Figure 25. An example form. The executives choose its colours, background and layout, so every form can look different.

- 1 Choose **Fill form** on the card you want.
- 2 Answer the questions. A **progress bar** near the top shows how many you have answered (for example *0 of 9 answered*). Questions marked with an asterisk (*) are required.
- 3 Choose the submit button at the bottom. You will see "Response submitted, thank you!"

Forms can ask for many kinds of answers:

Short answer

Paragraph

Multiple choice

Checkboxes

Dropdown

Linear scale

File upload

Date

Time

Closed forms, sign-in and editing

YOU SEE	IT MEANS
<i>Sign in to respond to this form</i>	The executives required sign-in for this form. Sign in, then open it again.
<i>This form is closed</i>	It stopped accepting responses, either manually or because its closing time passed.
Your previous answers with an Edit response button	The form allows one response per person, and lets you edit yours after submitting.
Your previous answers with no edit button	One response per person, and editing is switched off. Contact an executive if you must change something.

Using a shared link or QR code

Executives can share any form with a **direct link** or a **QR code** (they download it as a picture for flyers). Opening either takes you straight to that form without having to browse the Forms page.

Q TIP

Scanning a QR code on a poster with your phone camera is the quickest way to reach an event registration form.

A form with no menu around it

Some forms are built to be filled in without distraction: a registration on your phone while you queue, a survey during a meeting. For those, the executives can switch on **Hide the navbar while filling**, and the page drops the menu bar and the footer entirely so only the form is left, with a **Back to Forms** link in the header.

① GOOD TO KNOW

Only the filling-in screen goes bare. A closed form, a form that needs you to sign in, and the page that shows your submitted answers all keep the menu bar, so there is always a way back. Editing a response you already sent is the same plain screen as filling it in the first time.

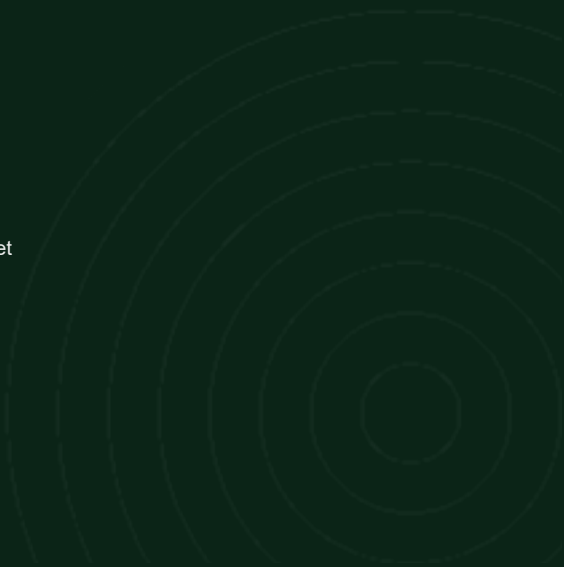

16

Live Quizzes and Battles

Join an event quiz from your phone, practise on your own, or challenge a friend to a head-to-head battle.

IN THIS CHAPTER

- Picking a quiz to play
- Joining a live game
- Playing a question on your phone
- Teams, streaks and power-ups
- Practice mode, and quitting
- Battles: challenge, duel and bracket
- Result cards you can share
- Champions, fair play and privacy

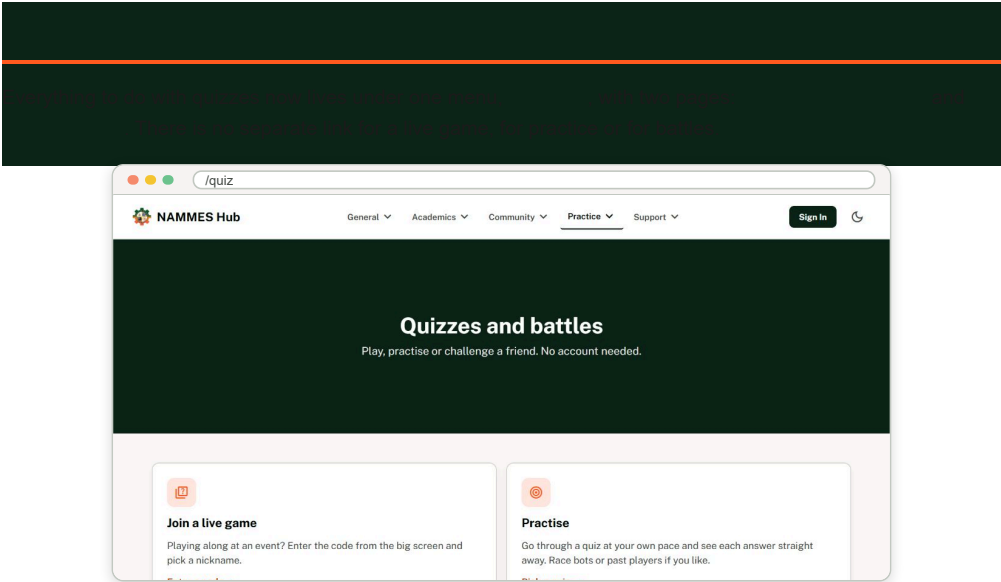

Figure 26. The Practice hub. One card for quizzes and battles, one for CBT practice, one for making your own.

ADDRESS nammeshub.com.ng/quiz	SIGN-IN NEEDED? No
WHO IT IS FOR Everyone, with just a phone	BEST FOR Events, revision and friendly rivalry

From the hub you can join a live game, pick a quiz to practise, or build a quiz from your own questions.

MODE	WHAT IT IS	NEEDS A HOST?	WHERE
Live game	An executive shows the questions on a big screen. Everyone answers on their phone at the same time and a leaderboard builds up.	Yes (an executive)	/play
Practice	Replay a quiz on your own, one question at a time, with instant feedback. Good for revision.	No	From the hub, or a link the executives share
Battle	Take on one other person (or a computer player), or be paired off against others in a knockout.	Not for duels	/battle
CBT exam	A timed paper with a pass mark, answered only at the end.	No	Chapter 17

Joining a live game

At an event the host shows a **lobby screen** with a **six-digit game code**, a **QR code** and the list of players who have arrived.

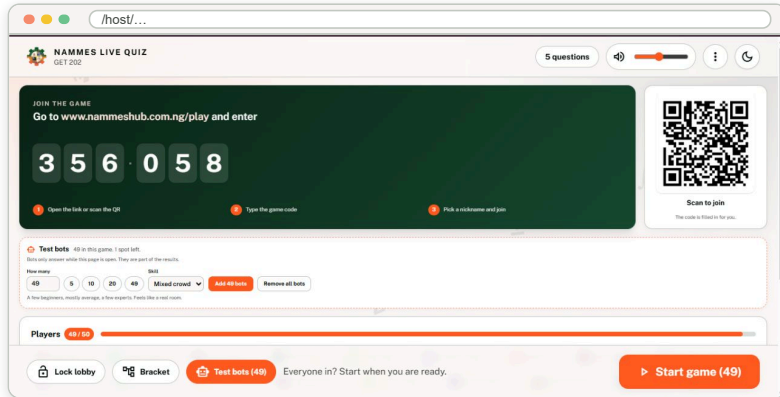

Figure 27. The host's lobby: the six-digit code, a QR code to scan, and the players who have joined.

- 1 Scan the QR code with your phone camera, **or** open **Practice → Quizzes and battles** and type the code under *Game code*.
- 2 Type a **nickname**. Keep it friendly: rude words are blocked, and the host can remove or rename anyone.
- 3 Pick one of **50 animated characters**. Each has its own dance for a right answer and its own sad move for a wrong one.
- 4 If the game is played in teams, pick your **team** or choose *Put me anywhere* and the Hub balances the teams for you.
- 5 You land on a **You're in** screen. Look for your name on the big screen and wait for the host to start.

① GOOD TO KNOW

Every game has a **player limit** set by the host. When the lobby fills up, a short countdown starts and the game begins by itself (*Lobby full!*). If the host has **locked the lobby**, nobody new can join.

⚠ CAREFUL

Join before the first question opens. Once a game has started you cannot slip in late, and the host can remove players who break the rules.

Playing a question

Your phone carries the question, the countdown, your power-ups and the answer buttons — everything you need without looking up. The projector carries the same question larger, for everyone who is watching rather than playing.

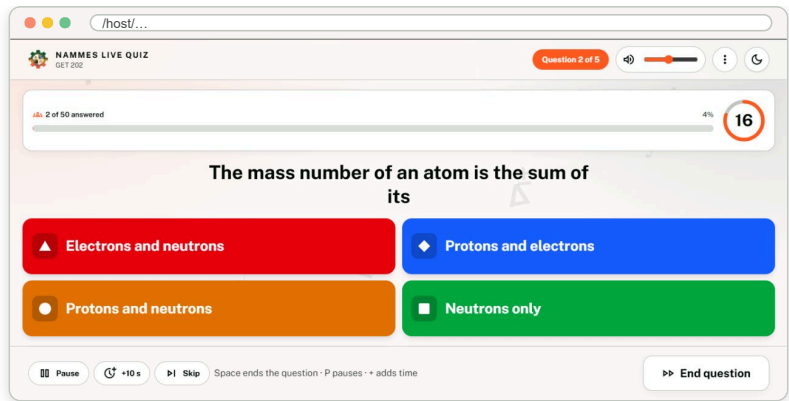

Figure 28. The projector during a question: the same question, larger, with the countdown and the answer shapes.

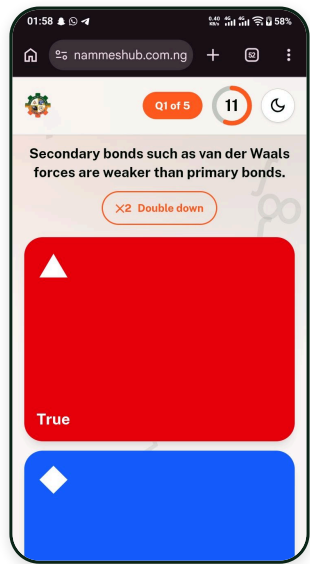

Figure 29. Your phone during the same question. The question text, your timer and the answers are all here.

After you answer, your phone says *Answer locked in*. You cannot change it, and it does not say whether you were right until the reveal.

Some questions carry a **picture** — tap it to enlarge — and some use maths such as x^2 . Tap a single option on most questions. Some ask for something different:

QUESTION TYPE	WHAT YOU DO
Multiple choice	Tap one of two to four coloured shapes.
True or false	Tap <i>True</i> or <i>False</i> .

QUESTION TYPE	WHAT YOU DO
Number answer	Type just the number, with no units. A small margin of error may be allowed.
Typed answer	Type a short answer. Spelling counts, capital letters do not.
Poll	Vote for your opinion. A poll has no right answer and gives no points.

1 · Question Tap your answer	2 · Reveal Right answer shown	3 · Leaderboard Top players	4 · Next question Repeat	5 · Podium Final results
---------------------------------	----------------------------------	--------------------------------	-----------------------------	-----------------------------

HOW POINTS WORK

A right answer earns points, and **speed counts**: an instant answer earns full points and a last-second answer earns about half. A wrong answer or no answer earns nothing. The timing is measured by the Hub's own clock, so a slow phone connection does not help or hurt anyone.

Teams, streaks and power-ups

Hosts can switch on extras to make a game livelier. Your phone tells you whenever one is active.

EXTRA	WHAT IT DOES
Teams	Play class against class, hostel against hostel, or any split the host chooses. A team's score is usually the average of its members, so a big team does not win just by being big.
Streak bonus	Answer right several times in a row and earn up to +200 bonus points each time. One wrong answer resets the streak.
Double points	A question marked <i>Double points</i> is worth twice as much. A banner warns you as it opens.
Power-ups	Each player gets one Double down (a right answer earns double) and one 50/50 (two wrong answers are hidden). Use each once per game, and decide <i>before</i> you answer.
Comeback boost	Players in the bottom quarter earn 15% extra on right answers, shown as a <i>Comeback +15%</i> chip, so nobody gives up.

TIP

Double down is spent the moment you tap it, even if you then run out of time. Use it only when you are sure.

If the host pauses the game you will see *Paused by the host. The clock is stopped*. Nobody loses time. Phones also have an optional **sound effects** switch (off by default) that adds short sounds and a small vibration for right and wrong answers.

Practice mode

Practice is for revision: no host, no crowd, no pressure. Open **Practice → Quizzes and battles** and choose **Pick a quiz** to see every quiz the executives have opened for practice. If the executives send you a direct link of the form `/practice/...`, it takes you straight there instead.

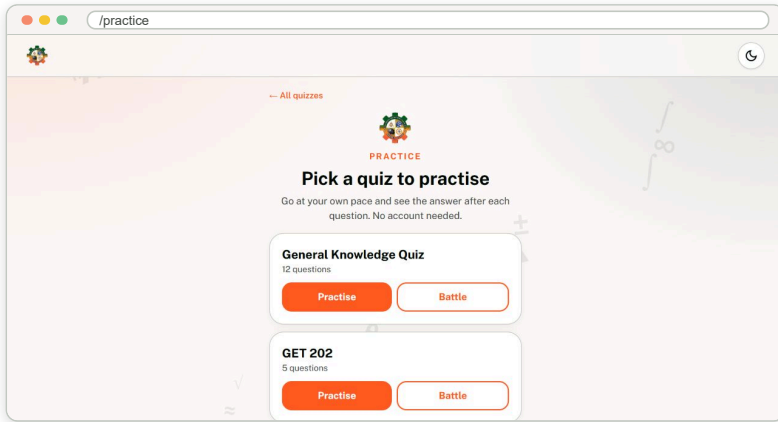

Figure 30. Pick a quiz to practise: one card per open quiz, each with its question count.

- 1 Open the practice link, or pick a quiz from the list, then type a **nickname** and pick a character.
- 2 Choose **Start practising**. Questions arrive **one at a time**, at your own pace.
- 3 After each answer you see straight away whether you were right, the correct answer and your points.
- 4 At the end you get your score, accuracy and the *Practice top 10 (just for fun)*. Choose **Try again** to go again.

You can also **race** while you practise. Pick *Play against* and choose four computer players, or *Race past players* to compete against the saved results of people who practised before. A race bar shows who is ahead after each question.

① GOOD TO KNOW

The practice top 10 is labelled *just for fun* because instant feedback lets you learn the answers by replaying. It is kept separate from live game results.

STOPPING PART WAY

Changed your mind halfway? There is a **Quit practice** button at the bottom of the run. Tap it once and it asks you to confirm — *Tap again to quit. This run will not be saved.* — and a second tap ends the run and returns you to the start.

① GOOD TO KNOW

The warning is literal. An unfinished run is left out of the practice leaderboard and cannot be raced as a ghost, so quitting costs you nothing and changes nothing for anyone else.

Battles

A **battle** is a head-to-head. Open **Practice → Quizzes and battles**, pick a quiz that has battles switched on, choose a nickname and a character, then choose one of these:

CHALLENGE A FRIEND

You and your friend play the **same questions at different times**.

- 1 Choose *Challenge a friend*. Answer the set of questions the quiz chose for battles.
- 2 When you finish, choose *Share the link* and send it in a chat. The message reads *Battle me on NAMMES Hub*.
- 3 Your friend opens the link, sees your nickname, character and **only your final score** (*Your score to beat*), and plays the same questions.
- 4 Both of you then see the **head-to-head**: each score, who won each question, and the winner. You can return to the same link later to see the result.

A challenge link works for **7 days** and can be accepted once. Changed your mind? Choose *Cancel this challenge* and the link stops working.

LIVE DUEL

Two people play **at the same moment**, with no host.

- 1 Choose *Live duel* and *Start a duel*. You get a short **battle code** and a link.
- 2 Your opponent opens the link, or types the code at nammeshub.com.ng/battle. The duel starts a few seconds after they join.
- 3 Both phones open each question at the same time. A score bar shows both players; you can see that the other person has answered, but not *what* they answered.
- 4 After each question the right answer and the points are shown. At the end you see the winner and the question-by-question comparison, and can start another.

Nobody to play with? Choose *Duel a bot*, pick a **Bot skill** (from gentle to sharp) and play right away. The bot answers after a realistic thinking time.

The duel waits if a player goes quiet: after 20 seconds the other player sees that their opponent has dropped out, and after about 45 seconds the duel is won by default. Choose *Leave duel* if you want to quit, but remember that **leaving a duel that is under way gives your opponent the win**; the Hub asks you to confirm first.

KNOCKOUT BRACKET

At some events the host switches a live game into a **bracket**. Players are paired off at random; if the number is odd, one player gets a computer opponent so nobody sits out. Each pair is scored only against each other, the winners move on, and a bracket that fills in live is shown on the big screen. The last player standing is the champion, and the podium shows the champion, the runner-up and the semi-finalists.

Your result card

Finished a game, a practice run or a duel? You can turn the result into a **card**: a tall picture, built for a phone, with your character and your numbers on it.

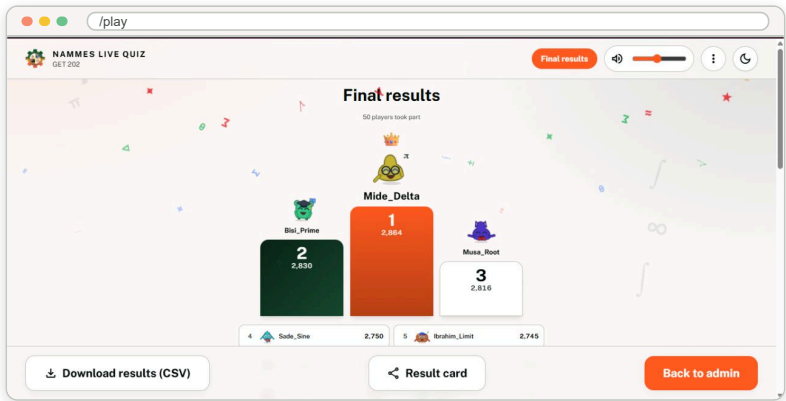

Figure 31. The final results, with the character you picked and the top three on the podium.

- 1 On the finished screen, choose **Share my result**. On a duel it reads **Share this duel**.
- 2 The card appears in a window captioned *Your result card*. Close it with the red cross or **Esc**.
- 3 Choose **Share** to send it through your phone's own share sheet — WhatsApp, Instagram, X, wherever you like — or **Save** to keep the picture on your device.

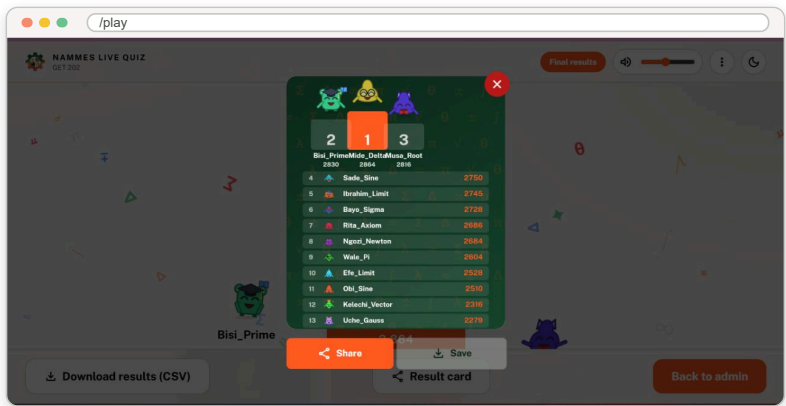

Figure 32. The card, with Share and Save beneath it.

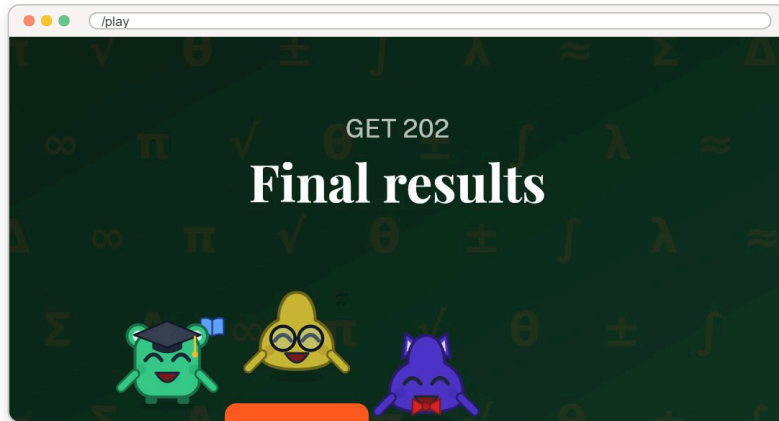

Figure 33. The finished card: character, podium, rank and score, sized for a phone.

① GOOD TO KNOW

A card from a **hosted game** carries your rank and the line *placed 3 of 42*. A practice run has no rank, because there is nobody to be ranked against, so that line is simply left out.

Q There is no Share my result button.

Two things cause this. Either the game finished before share links existed, in which case the button is hidden rather than shown and then failing; or you are looking at a screen that has no card, such as the practice *Try again* page.

Champions and ratings

Finished battles between two real players feed the **Champions** list on the battle page: the best players **this week** and **all time**, shown with character and nickname only. Everyone starts at a rating of **1000**; beating a stronger player earns more than beating a weaker one. Computer players are never ranked.

① GOOD TO KNOW

Your record follows **your device**, not an account. Clearing your browser history starts a new record, and the page says so. A battle against a bot, or against yourself, never counts.

Fair play and privacy

- **The server is the referee.** Your phone never receives the right answer early and never decides a score.
- **No personal data.** Only a nickname, a character and your scores are stored. No email, no real name and no location.
- **Keep it clean.** Offensive nicknames are blocked and the host can remove anyone.
- **Connection problems** show *Connection problem. Trying again...* and the game carries on when your signal returns.

Q I typed the wrong code.

Check the six digits on the big screen. A code only works while its game is open, so a finished or expired game will not accept it.

Q The game says it is full or locked.

The host set a player limit or locked the lobby. Ask the host, or ask them to start another game.

Q My answer did not count.

Answers that arrive after the timer ends (plus a short grace period) are refused. Make sure you tap before time runs out.

Q Can I challenge someone who is not nearby?

Yes. A *Challenge a friend* link can be sent to anyone and played any time in the next 7 days.

17

Practice Exams and Your Own Questions

Timed exam papers that behave like the real CBT, with a clock and a pass mark. You can sit one the department has published, or build your own from your own questions.

IN THIS CHAPTER

- Finding an exam
- Starting, flagging and submitting
- Reading your result
- Making your own practice exam
- Making your own quiz and sharing it

ADDRESS nammeshub.com.ng/cbt	SIGN-IN NEEDED? No
WHO IT IS FOR Everyone	BEST FOR Timing yourself before the real thing

A **CBT practice exam** is a timed paper that behaves like the real thing: one paper, a countdown, and answers revealed only at the end. It is open to everyone and needs no account.

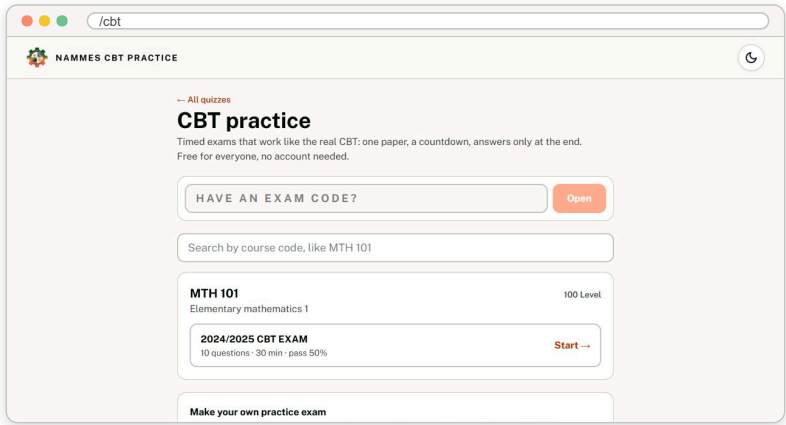

Figure 34. The CBT practice list. Each row shows how long the paper is and what you need to pass.

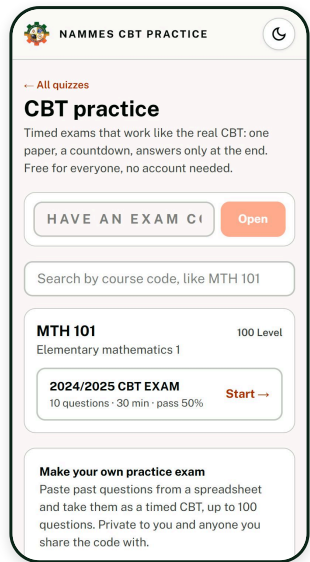

Figure 35. The same list on a phone, where the exam code box sits above it.

Finding an exam

- 1 Open **Practice** → **CBT practice**, or go to `/cbt`.
- 2 Search by **course code** (for example `MTH 101`) if you want one course, or use the level tabs — *All levels*, *100 Level*, *200 Level* and so on, up to *Other*.
- 3 Each row tells you *N questions*, *M min* and *pass P%*, so you know what you are walking into. Choose **Start** →.

① GOOD TO KNOW

If you were given an exam **code** instead of a link, type it into the *Have an exam code?* box at the top of the page and choose **Open**.

① GOOD TO KNOW

My progress on this device keeps your attempts, your best score and your latest one. It lives in your browser, not on an account: clearing your browser data clears it too.

Before you start

The exam's own page gives you four facts and no surprises: how many **Questions**, the **Time** allowed, the **Pass mark**, and how big the **Question bank** behind it is.

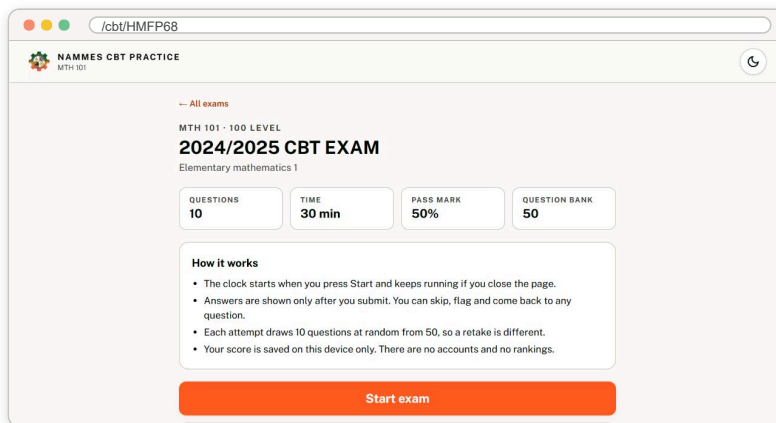

Figure 36. The start page for one exam.

- **Start exam** begins the paper and starts the clock.
- **Study mode: no timer, see each answer**, where the paper offers it, lets you read the answer immediately with no clock. Good for learning rather than timing.
- **Continue exam** appears if you left one unfinished. *Forget it and start fresh* throws the old attempt away.
- **Your attempts on this device** lists up to eight, each marked *Passed* or *Not passed*.

Sitting the paper

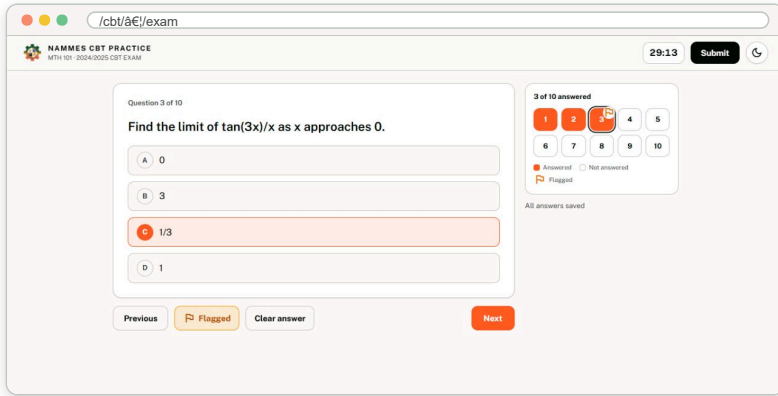

Figure 37. An exam in progress: the countdown, the question navigator on the right, and the flag button.

- The **countdown** is at the top. When it reaches zero the paper is submitted for you.
- **Flag for review** marks a question you want to come back to. The button then reads *Flagged*.
- The **navigator** on the right is a grid of every question, with *Answered*, *Not answered* and *Flagged* shown by colour. Tap any number to jump there.
- **Previous** and **Next** move through the paper. **Clear answer** wipes the answer you gave.
- The line under the navigator says *All answers saved*. If it ever says *Not saved yet. Retrying....*, wait — it is trying again.
- When you are ready, choose **Review and submit**. A confirmation counts what you answered, what you left blank and what you flagged, with **Submit now** or *Keep working*.

① GOOD TO KNOW

The clock belongs to the server, not to your tab. Closing the app or losing signal does not stop it, and a refresh brings you back to the same paper with the same time left. That is deliberate: it is the only way an exam can be timed fairly when half the hall is on patchy data.

① GOOD TO KNOW

During a timed attempt the right answers never reach your device at all. The server holds them and grades only when you submit, so nothing you do to your phone can reveal them.

Your result

You get your score, *Passed* or *Not passed* against the pass mark, and the time you took. From there you can **Retake**, go back to **All exams**, or **Share result**. The review below the score filters to *All*, *Wrong*, *Unanswered* or *Flagged* questions, which is the fastest way to see the ones that cost you marks.

Making your own practice exam

If the department has not published a paper for your course yet, you can build one. Your questions stay in your browser until you create the exam, and no account is needed.

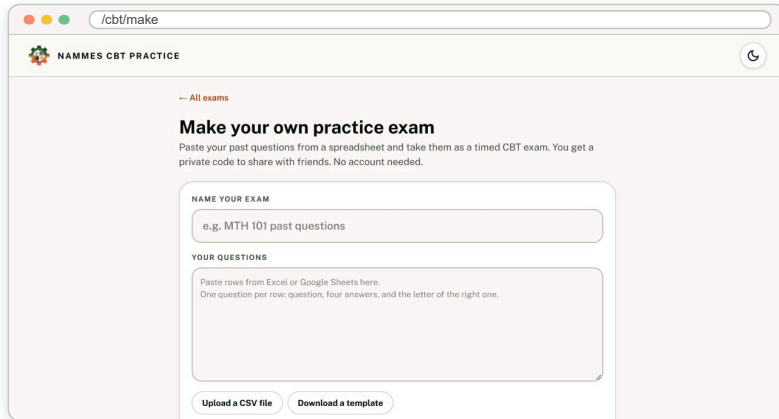

Figure 38. Make your own practice exam.

- 1 Open **Practice** → **CBT practice** and choose *Make your own practice exam* at the bottom, or go to `/cbt/make`.
- 2 Give it a **Name your exam** title.
- 3 Add questions by **pasting them** into *Your questions*, or by choosing **Upload a CSV file**. **Download a template** gives you the exact column layout.
- 4 A live count reads *N questions ready*. Anything the reader could not make sense of is listed with its row number, so nothing is silently dropped.
- 5 Set **Time allowed (minutes)**, **Pass mark (%)**, whether to **Shuffle the questions** and the **answers**, and **Keep this quiz for** 30, 90 or 180 days.
- 6 Choose **Make my exam**. You get a six-character code and a link.

Making your own quiz

The same importer also builds a **quiz** rather than an exam, for practising on your own or racing bots and friends. It lives at `/make`.

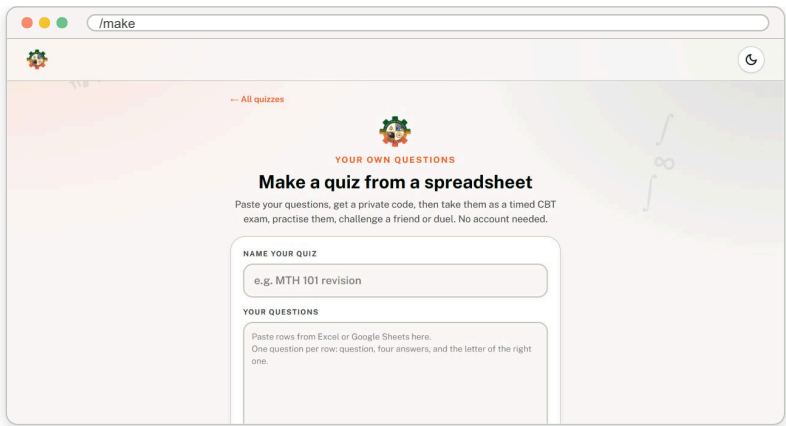

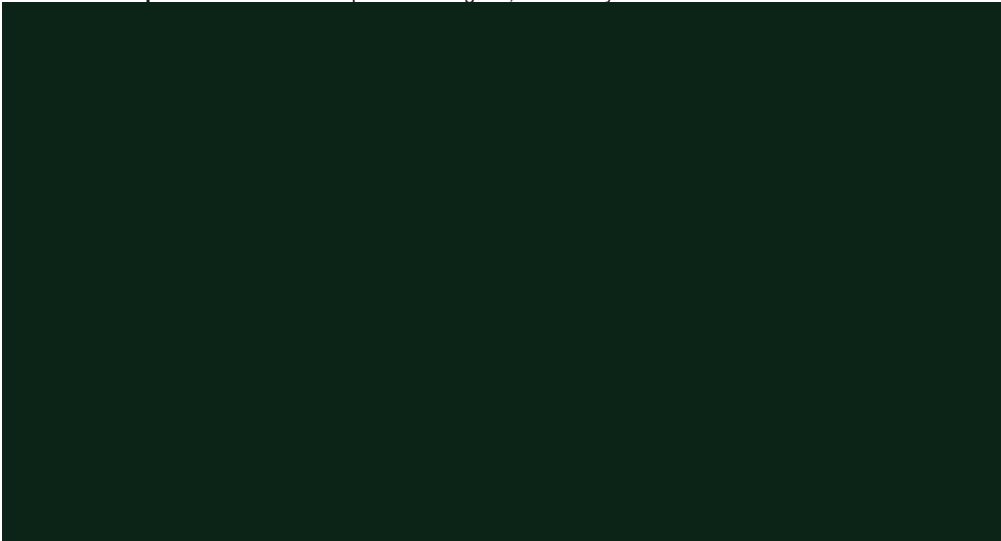

Figure 39. Make a quiz from a spreadsheet.

Your quiz opens on its own page, and from there you can do any of three things with it:

BUTTON	WHAT IT DOES
Take it as a timed CBT exam	Runs it as a clocked paper with a pass mark, exactly like a published exam.
Practise it	Replays it one question at a time with the answer shown after each one. No clock, no pressure.
Challenge a friend or duel	Opens the battle page with your quiz selected, so someone else can be challenged on it.

- **Share this quiz** sends the link to someone. It works for anyone, on any device.
- **Keep it longer** buys 90 or 180 days instead of the standard 30.
- **Delete this quiz** removes it and its questions for good, and asks you to confirm.

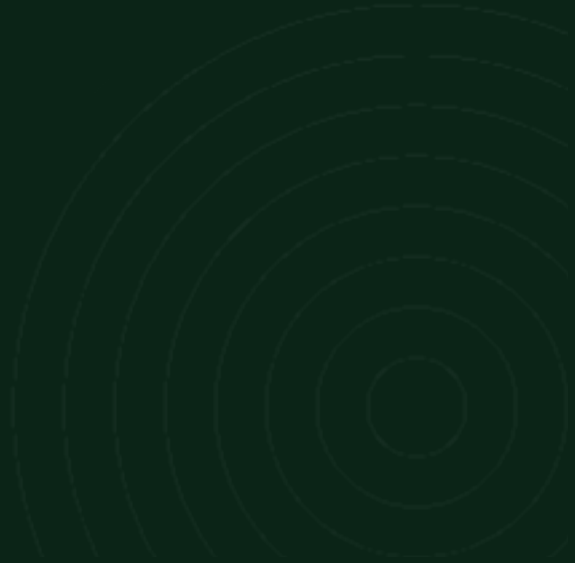

18

About, the ExcOs and Contact

Who NAMMES is, who is running it this session, and how to reach them.

IN THIS CHAPTER

- The About page
- Meet the ExcOs
- The Contact page
- Social media and the newsletter

ADDRESS nammeshub.com.ng/about	SIGN-IN NEEDED? No
WHO IT IS FOR New members, visitors, sponsors	BEST FOR Understanding what NAMMES stands for

The About page tells the story of the department and the association, and sets out what NAMMES believes in:

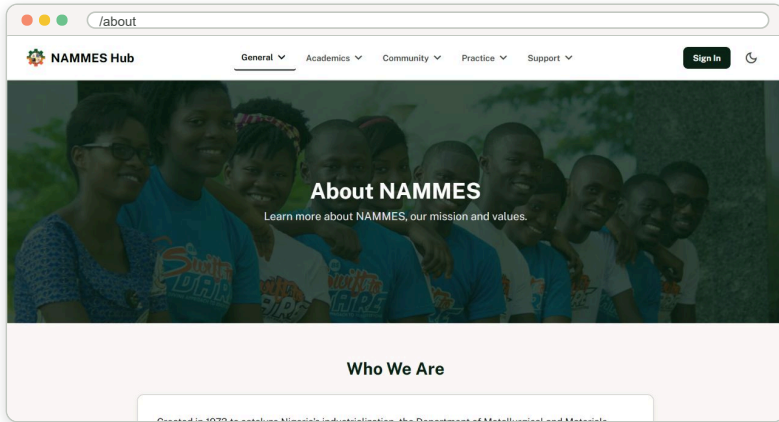

Figure 40. The About page: who we are, our vision, mission and the six values we work by.

- **Who We Are:** the history of the department (created in 1973) and what NAMMES does.
- **Vision:** an inclusive, innovative and industrious community committed to academic excellence, technical mastery and professional growth.
- **Mission:** to advance members' intellectual and professional development through skill-building, industry exposure and welfare support, while representing student interests.

Six **core values** guide the association:

Meet the Excos

The **ExcOs** are the Executive Council: the students elected to run NAMMES for the session, currently **The Aegis 26/27**. The *Meet the ExcOs* page shows each of them on a card with their **photo, name and role**, plus an **email** and **phone number** when they have chosen to share them (tap to write or call).

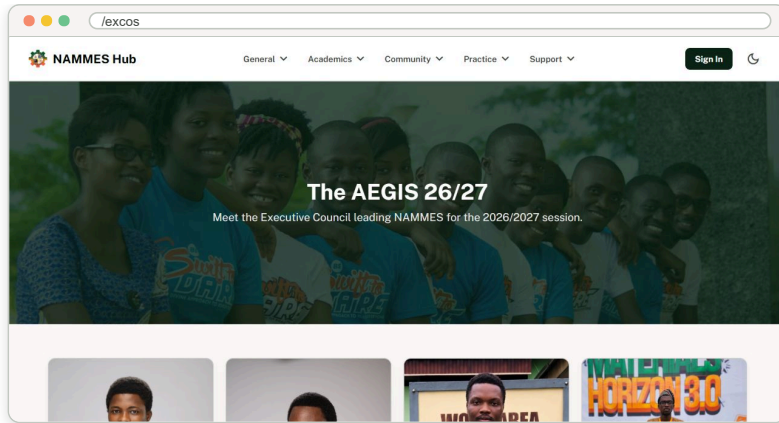

Figure 41. The Aegis 26/27, the Executive Council for the 2026/2027 session.

A shorter version, *Our Executives*, also appears near the bottom of the home page. The names and roles of the ten people who wrote this handbook are in Appendix D.

The Contact page

Have a question, a suggestion or a problem with the Hub? Open **Contact** in the menu.

- 1 Enter your **name** and **email**.
- 2 Write your **message** (up to 5,000 characters).
- 3 Tick *Verify you are human* and choose **Send message**.

Your message goes straight to the admins' **Messages** inbox. For a question about a specific role (say, welfare or sports) use the *Prefer to reach someone directly?* box on the same page to jump to the Excors and contact that person.

 A screenshot of the NAMMES Hub "Contact Us" page. The browser address bar shows "/contact". The navigation menu includes General, Academics, Community, Practice, and Support (which is highlighted). A "Sign In" button is in the top right. The main heading is "Contact Us" with the subtext "Questions, feedback, or ideas for NAMMES Hub? We'd love to hear from you." Below this is a contact form with fields for NAME (placeholder: "Your name"), EMAIL (placeholder: "you@example.com"), and MESSAGE. To the right of the form is a box titled "Prefer to reach someone directly?" with the text "Get in touch with an Exco for role-specific questions." and a link "Meet the Excors →".

Figure 42. The Contact page: a simple form on the left, direct routes and social links on the right.

Social media and the newsletter

The association's channels are shown as icons on the Contact page and in the footer of every page. Depending on what the executives have connected, these can include the **WhatsApp community**, **X**, **Instagram**, **LinkedIn** and **YouTube**. The *Stay Connected With Us* box in the footer lets you subscribe to the **NAMMES CommuniquÃ©** newsletter.

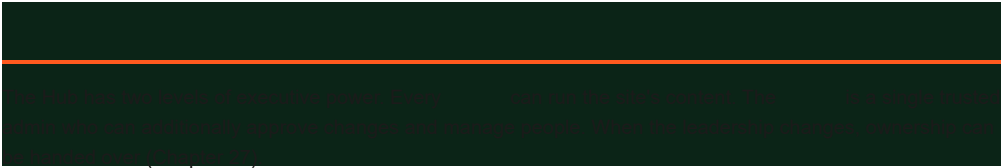

19

Before You Begin

Who admins are, how to open the Admin area, and the one editing pattern you will use everywhere.

IN THIS CHAPTER

- Owner and admin: who can do what
- Signing in to the Admin area
- The dashboard
- Add, edit and delete: the common pattern
- Golden rules for admins

POWER	ADMIN	OWNER
Open the Admin dashboard and all content sections	Yes	Yes
Publish Resources, Opportunities, Excors, Outlines, Timetables, Banners, Links, Home page	Immediately	Immediately
Create or edit News, Events and Award seasons	Goes to the <i>Review queue</i> for approval	Published immediately
Delete content	Yes	Yes
Approve or reject pending edits (Reviews)	No	Yes
Make or remove admins, transfer ownership, delete or anonymise accounts	No	Yes
Disable or enable a member's account	Yes	Yes
System page: switches, email queue, logs	No	Yes
Read Messages, run Broadcasts, build Forms, run Awards stages	Yes	Yes

Signing in to the Admin area

- 1 Sign in at `/login` with your normal account.
- 2 Open your **account menu** (top right) and choose **Admin**, or go to `/admin`.
- 3 If you have switched on two-factor login you are now asked for the **6-digit code** from your authenticator app.
- 4 The **Admin Dashboard** opens.

① GOOD TO KNOW

Anyone can sign up for an account, but only people who have been made admins can open `/admin`. Everyone else is sent back to the home page.

The dashboard

The dashboard is a grid of tiles, one per job, labelled by category. Choose a tile to open that section. The **Submissions** tile shows a badge with the number of student contributions waiting for you. The owner also sees the **Reviews** and **System** tiles, which are marked as theirs.

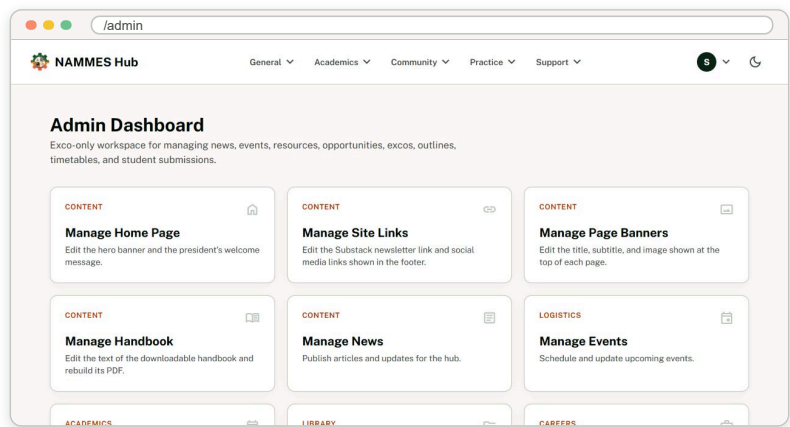

Figure 43. The Admin Dashboard. Tiles are grouped by category; the Submissions tile carries a badge.

What each tile opens:

CATEGORY	TILES
Content	Home Page, Site Links, Page Banners, Handbook, News.
Academics	Outlines, Submissions, Timetable, Calendar.
Logistics	Events, including the photo galleries.
Library	Resources.
Careers	Opportunities.
Directory	Excos, Users, Security, System (owner).
Engagement	Messages, Forms, Awards, Live Quiz, Broadcasts, Email Templates, CBT Exams.
Governance	Reviews (owner).

Add, edit and delete: the common pattern

Most sections (News, Events, Resources, Opportunities, ExcOs, Outlines, Timetable) share the same screen, so you learn it once:

- 1 **Open the section** from the dashboard. You see a list of everything that exists.
- 2 Choose **Add [Section]** to create something. A form opens; fill it in and choose **Save changes**.

- 3 To change something, choose the **pencil (Edit)** icon on its row, change the fields and save.
- 4 To remove something, choose the **bin (Delete)** icon. Click again on **Confirm delete**. Nothing is removed until you confirm.
- 5 Use **Back to Admin** at the top to return to the dashboard.

Long lists such as Outlines and Timetable have **filter chips** (for example *100 Level*, *200 Level*) above the list, so you can work on one level at a time.

CAREFUL

The red **Delete All** button at the top of a section removes **every item in the whole list**, or every item in the level you have filtered to. It asks you to confirm, but there is no undo. Read the confirmation message twice, and never use it just to tidy up.

PICTURES

Every photo upload (news, events, galleries, excos, nominees) must be **JPEG or PNG and no larger than 5 MB**. If one is refused, compress or convert it and try again.

Golden rules for admins

- **Proofread before you publish.** Members treat the Hub as official.
- **Turn on two-factor login** for your admin account (Chapter 24).
- **Never share your login.** Ask the owner to add your colleague.
- **Use maintenance mode** before big changes.
- **Edit rather than delete**, and keep members' data private.

20

Managing the Site's Content

The home page, links, banners, news, events, resources, opportunities and the excos: everything members see first.

IN THIS CHAPTER

- Home page
- Site links and maintenance mode
- Page banners
- News
- Events and event galleries
- Resources, Opportunities and ExcOs
- The Handbook: edit this book

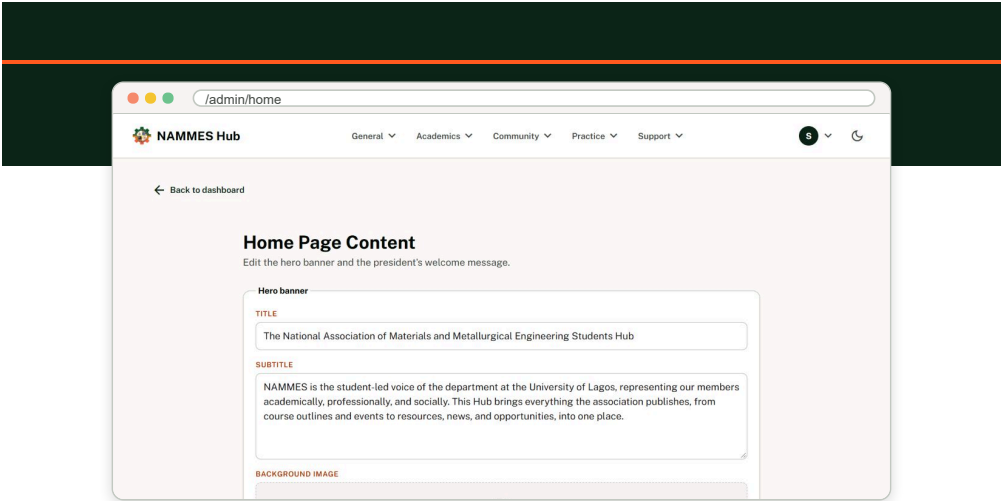

Figure 44. The Home Page editor: the hero banner above, the president's message below.

Admin → Home Page edits the two big things on the front page.

BLOCK	FIELDS
Hero banner	Title and Subtitle (both required) and a Background image (a dark green overlay is added so the white text stays readable).
President's message	The president's Name and Role , the Message itself and a Photo .

Choose **Save** and you will see "Home page content updated." The change is live at once.

TIP

Refresh the president's message at the start of every session, and use a landscape, high-resolution hero picture for the best result on big screens.

Site links and maintenance mode

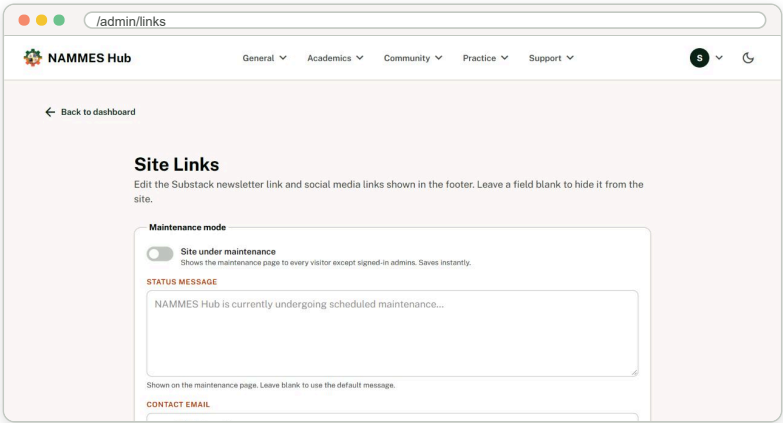

Figure 45. Site Links. Everything that appears across the whole site, in one screen.

Admin → Site Links holds settings that appear across the whole site.

SETTING	WHERE IT APPEARS
Contact email	Shown on the maintenance page.
Substack URL	Powers the newsletter sign-up box in the footer.
Social media links	WhatsApp community, X, Instagram, LinkedIn and YouTube icons in the footer and on the Contact page. Only links you fill in are shown.
Maintenance mode	A switch that shows the <i>We'll be right back</i> page to every visitor except signed-in admins , with your own Status message . It saves instantly when you flip it.

CAREFUL

Maintenance mode takes effect the moment you flip the switch. Members cannot use the Hub until you switch it off again, so flip it back when you are finished.

Page banners

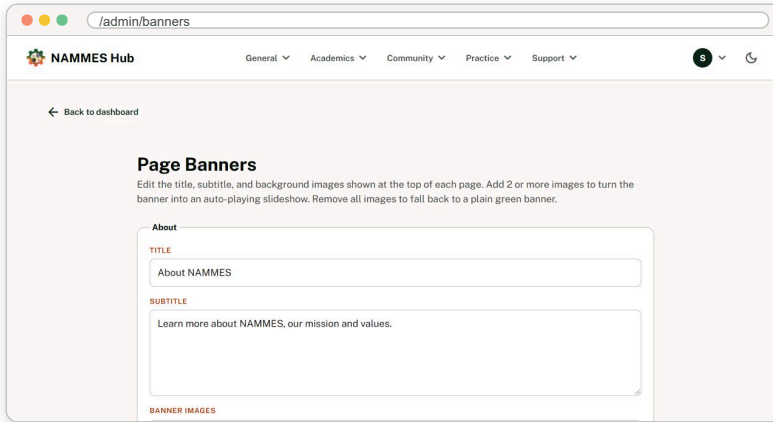

Figure 46. Page Banners. Each page gets its own fieldset of title, subtitle and pictures.

Admin → Page Banners controls the title, subtitle and pictures at the top of **fifteen** pages: **About, Awards, Calendar, CGPA Calculator, Contact, Curriculum, Events, Forms, Meet the ExcOs, News, Opportunities, Outlines, Quizzes, Resources** and **Timetable**.

- **Title** and **Subtitle**: the words on the banner (the CGPA banner is pictures only).
- **Banner images**: add one for a still banner, or several for a slideshow.
- **Transition**: *Fade*, *Slide* or *Zoom* between pictures.
- **Seconds per slide**: how long each picture stays (default 5).

🕒 GOOD TO KNOW

The transition and timing controls only appear once a page has two or more pictures. One picture is just a banner.

🔒 ADMIN ONLY

New pages need a banner row added before their title and subtitle can be edited. If a banner title you have typed never appears on the page, the row is probably missing — ask the owner rather than typing it again.

News

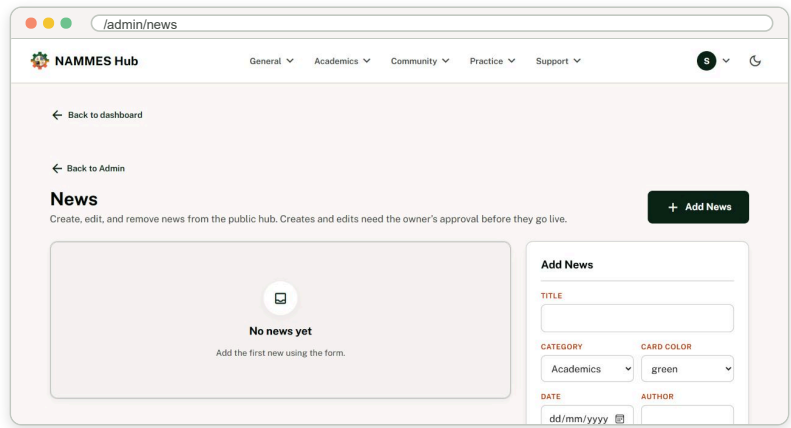

Figure 47. News. The list, the filters, and Add news across the top.

Admin → News . Add an article with these fields:

FIELD	NOTES
Title	A clear headline. It also identifies the article in the list.
Category	Academics, Governance, Welfare, Industry, Call for papers or Resources. Members filter by this.
Card color	Green, orange or neutral, the accent on the article card.
Date	Publication date; newest first on the site.
Author	Who wrote it.
Body	The article text. Web addresses become links.
Badge (optional) and Badge label	A "New" or "Updated" tag on the card, with your own wording.
Image	The story photo; adjust its width with the slider.

REVIEW GATE

Admins' new articles and edits show as **Pending review** and go live only after the owner approves them. You will see them listed under *Awaiting the owner's approval*. The owner's own edits publish immediately.

Events and event galleries

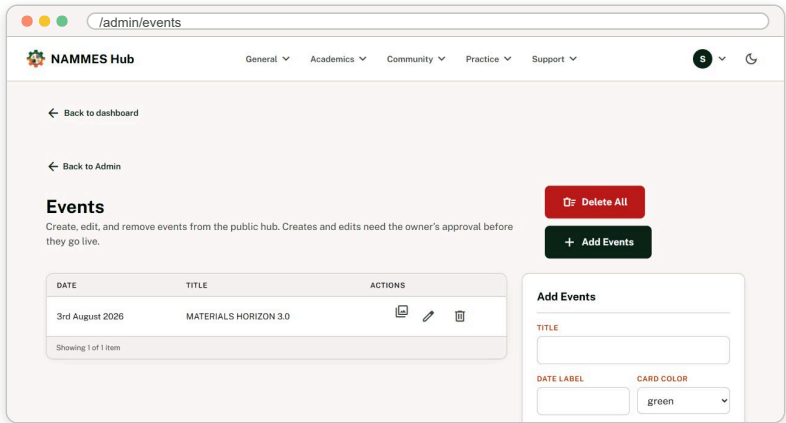

Figure 48. Events. Each row carries the card colour, date label and a gallery link.

Admin → Events . Fields: **Title**, **Date label**, **Card color** (green or orange), **Location / time** (optional), **Description** and **Photo** (the flyer or cover picture).

⚠ CAREFUL

Type the date in a way people *and* the Hub can read, such as **3rd October 2026** or **3 October 2026** . The Hub uses it to move the event from Upcoming to Past automatically. A date it cannot understand leaves the event in Upcoming.

Each event row also has a **Gallery** icon. Choose it to open that event's gallery page:

- 1 Choose the upload area, or drag pictures in. You can **select many photos at once** (JPEG or PNG, up to 5 MB each).
- 2 Wait for "N photos added."
- 3 To remove a photo, choose the ✕ on it. You will see "Photo removed."

The photos appear on the event's public *Gallery* tab straight away. Events, like News, go through the owner's review when created or edited by an admin.

Resources, Opportunities and ExcOs

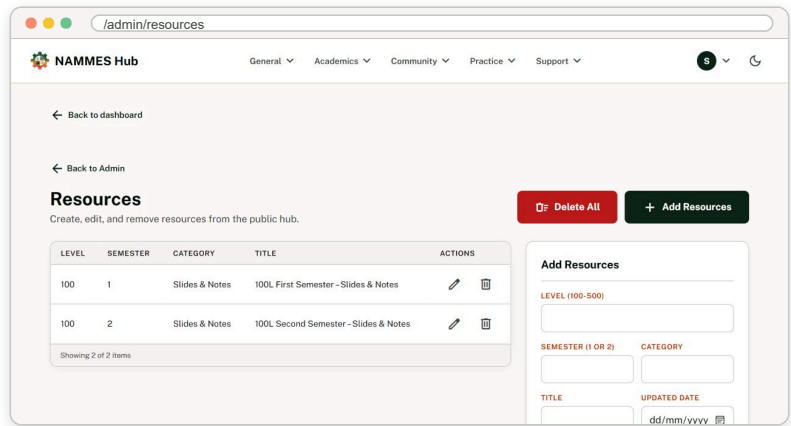

Figure 49. Resources. Opportunities and ExcOs use the same screen with different fields.

SECTION	FIELDS TO FILL IN	TIPS
Resources	Level (100-500), Semester (1 or 2), Category, Title, Updated date, Drive link	Paste a Drive share link set to <i>Anyone with the link can view</i> , or members will be blocked.
Opportunities	Title, Organization, Type (Scholarship or Internship), Deadline, Apply link	Members see the list sorted by soonest deadline. Remove entries once their deadline has passed.
ExcOs	Role, Name (optional), Display order, Email, Phone, Photo	Display order is a number: 1 appears first. A role with no name shows a placeholder, so you can list vacancies.

 TIP

When a new executive council takes over, edit the existing Exco rows (name, photo, contact) instead of deleting them, and update the session label in the Page Banners for Meet the ExcOs.

The Handbook: edit this book

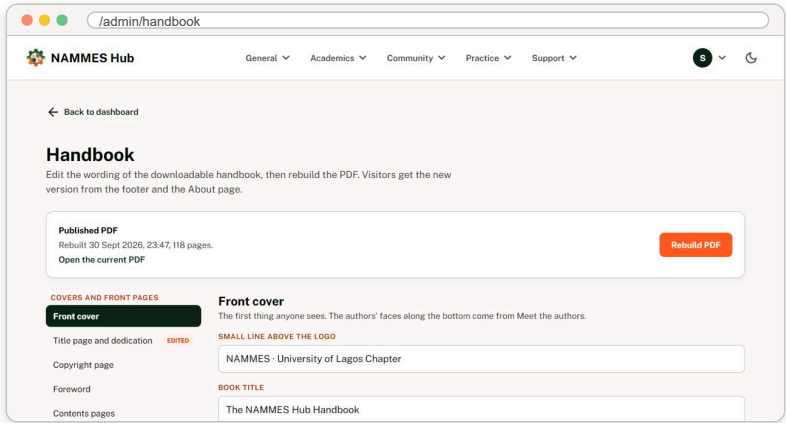

Figure 50. Admin → Handbook. Every section of this book is an editable panel, and the PDF rebuilds from here.

Admin → Handbook lets you change the wording of this very handbook. The list on the left starts with the covers and front pages (front cover, title page, copyright, foreword, contents, *Meet the authors*, back cover), then every chapter and appendix. A small **Edited** tag marks pages you have changed.

- 1 Choose a page and click into the text. Use the toolbar for bold, italic, headings, lists, links and **Add box** (Tip, Careful and so on). Screenshots are fixed; captions can be edited.
- 2 Choose **Save changes**. The download has not changed yet, and **Restore original text** undoes your edits to a page.
- 3 When you have finished, choose **Rebuild PDF** at the top and wait a minute or two. The footer and About page then serve the new version, with the contents renumbered.

21

Managing Academics

Outlines, timetables and the approval queue for student contributions.

IN THIS CHAPTER

- Outlines
- Submissions: the approval queue
- Timetables
- Where the calendar lives

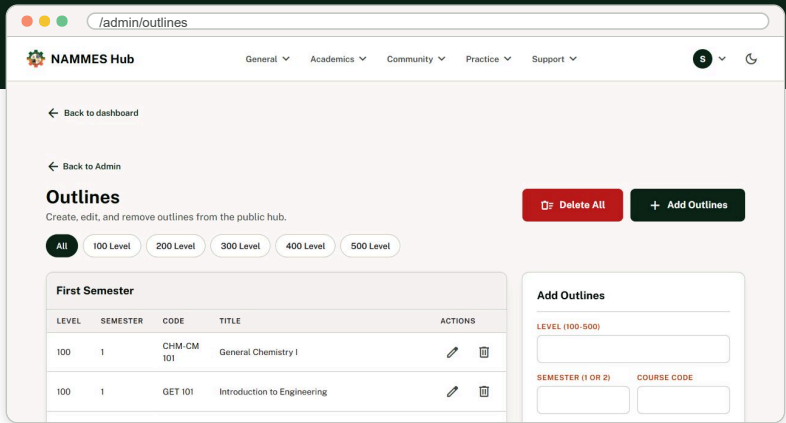

Figure 51. Outlines, grouped by level with filter chips above the list.

Admin → Outlines holds one entry per course. Use the **level filter chips** to work on one level at a time.

FIELD	NOTES
Level, Semester	Level 100-500 and semester 1 or 2. These place the course in the right list.
Course code, Title, Units	For example <i>CHM-CM 101, General Chemistry I, 2 units</i> .
Status	Optional. C (compulsory) or E (elective). It shows in the course list, on the outline page and in both PDFs, so students can tell which courses are required.
Lecturer	Optional. Members see "TBA" style placeholders if it is empty.
Updated date	When the outline was last revised.
Description	A short summary of the course.
Topics	A list: one topic per line .
Recommended texts	A list, one book per line. Include a web address in a line to make it a clickable link.
Past exam questions link and file name; Lecturer notes link and file name	Optional Drive links and the label members see on the button.

TIP

Fill in topics and recommended texts carefully. They are what students actually read and print. The *Download PDF* button on the public site is built from these same fields.

Submissions: the approval queue

Admin → Submissions is where student contributions arrive. The dashboard tile and the navigation menu show a red badge with the number waiting.

- 1 Open the **Pending** tab (its title shows the count).
- 2 Open each contribution: check the **type**, **session**, **title** and the file or link.
- 3 Choose **Approve** if it is genuine and useful. It appears on that course's outline page immediately.
- 4 Choose **Reject** if it is wrong, spam, duplicated or unsafe.
- 5 The **Approved / rejected** tab keeps the history. You can delete an entry from there if it should never have been published.

⚠ CAREFUL

Open every file or link before approving it. Make sure it is the right course, readable, and does not contain personal information or unsafe links.

Timetables

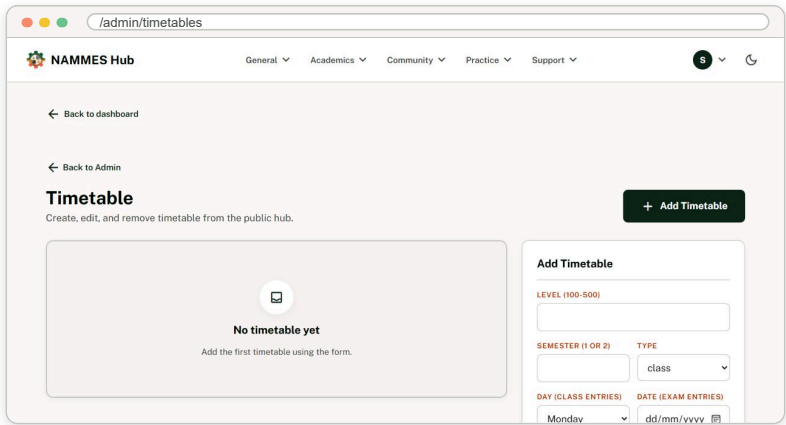

Figure 52. Timetable. Class and exam entries use the same rows; the filter chips switch level.

Admin → Timetable uses one row per lecture or exam, with level filter chips. Set **Type** first, because it decides which of two fields you need.

FIELD	CLASS ENTRIES	EXAM ENTRIES
Level, Semester, Type	Required	Required
Day (Monday to Friday)	Required	Leave empty
Date	Leave empty	Required

FIELD	CLASS ENTRIES	EXAM ENTRIES
Start time, End time	Required	Required
Course code, Course title, Venue	Required	Required
Lecturer, Notes	Optional (notes such as <i>Practical Lab</i> or <i>Tutorial</i>)	Optional

The public page sorts rows for you: class entries by day and time, exams by date. Members can then download a PDF or an image straight from the page.

Where the calendar lives

The dates themselves are not part of this chapter. Senate dates, the calendar's design and its reminder emails all sit behind one Admin tile, **Calendar**, covered in full in the next chapter.

① GOOD TO KNOW

Outlines, timetables and the calendar answer three different questions. An outline says what a course covers, a timetable says when a class or paper happens, and the calendar says when the session's lectures, examinations and registration run. They are edited separately, so a correction to one does not disturb the others.

22

Managing the Calendar

The four screens behind Admin → Calendar: senate dates one at a time or pasted in bulk, the page design, the active session, and the reminder emails.

IN THIS CHAPTER

- One route, four tabs
- Dates, row by row
- Pasting a whole calendar
- Designing the calendar page
- The active session
- Email reminders

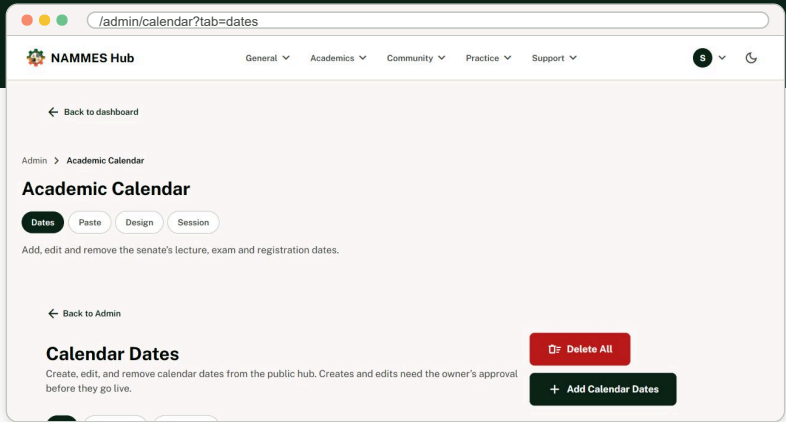

Figure 53. Admin → Calendar, on the Dates tab. The four tabs are the whole calendar admin area.

Admin → Calendar is a single page with four tabs, rather than four separate pages. That matters because they all describe the same thing — one calendar — and you rarely need more than one at a time.

TAB	WHAT YOU DO THERE
Dates	Add, edit and delete senate dates, one row at a time.
Paste	Import a whole printed calendar at once, review it, then commit it.
Design	Choose the colours, icons and layout the public calendar page uses.
Session	See and change which academic session is current, and archive the last one.

ADMIN ONLY

Every tab can be reached from the one Calendar tile on the dashboard. The tab stays in the address bar, so `/admin/calendar?tab=paste` is a shareable link to a particular screen — handy when you are telling a colleague exactly where to look.

GOOD TO KNOW

Admins other than the owner can use all four tabs, but their changes to dates queue for the owner to approve, exactly like news and events. Design and session settings are owner-only.

Dates, row by row

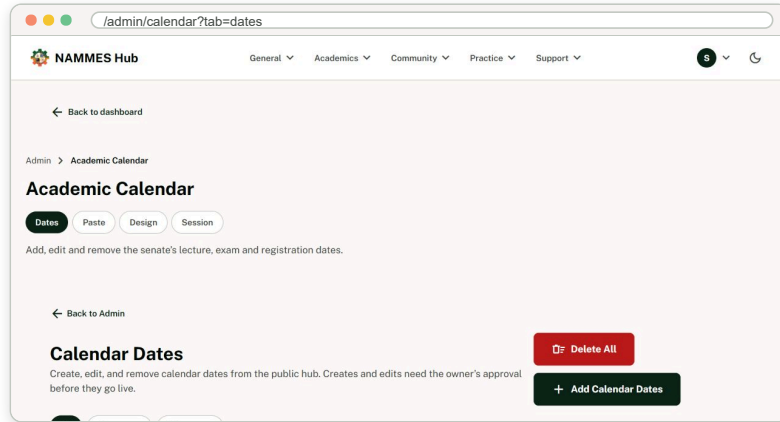

Figure 54. The Dates tab. Rows are grouped by semester.

The **Dates** tab is an ordinary resource list. Each row is one item on the calendar.

FIELD	NOTES
Title	What students will read, such as <i>Second semester examinations begin</i> .
Kind	Lectures, exams, registration, break, convocation, orientation or other. The kind decides the colour and icon students see.
Session and Semester	Which session and which semester this belongs to. This is how last year's dates stay separate from this year's.
Remind (days before)	How many days ahead to email a reminder. Leave it empty for no reminder; zero means remind on the day itself.
Starts and Ends	Leave <i>Ends</i> empty for a single day. Fill it in for a period such as a week of examinations.
Note	Optional extra line shown under the title.

① GOOD TO KNOW

A date with nothing in it is a real state, not an unfinished record. An item with no start date is collected in the *Dates to be announced* panel on the public page rather than sitting on the grid pretending to be a date you do not have.

⚠ CAREFUL

Leave *Remind (days before)* **empty** when you do not want an email. Zero is not the same as blank: zero sends a reminder on the day.

Pasting a whole calendar

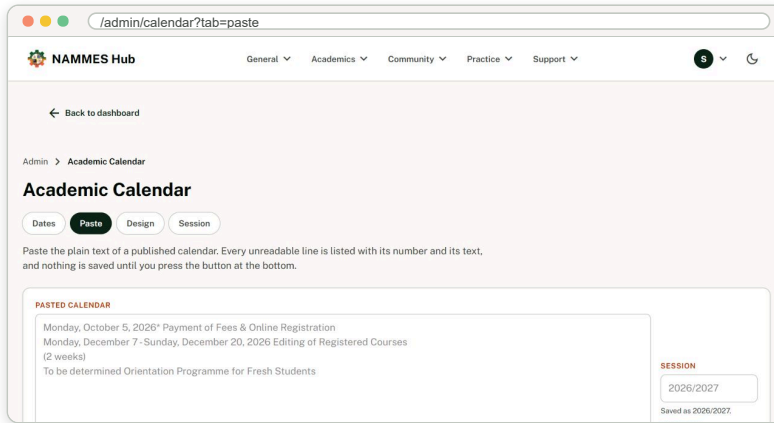

Figure 55. The Paste tab. Text goes in, a preview comes out, nothing is saved until you confirm.

Senate calendars arrive as a wall of text, usually in a PDF or a WhatsApp forward. The **Paste** tab takes that text directly.

- 1 Paste the calendar into the **Pasted calendar** box, or press **Paste from clipboard**. Set the **Session** and **Semester** they belong to.
- 2 A live count reads *N dates read*, and a **Preview** appears with one row per date. Each row has a tick box, a *kind* selector and a *remind* box.
- 3 Choose a **kind** for every row. The reader never guesses one, because guessing “registration” as “orientation” puts the wrong colour on the wrong week.
- 4 Rows that look like repeats are flagged and start **unchecked**, so a line the senate printed twice is not added twice. Tick it only if it really is two separate items.
- 5 Any line that could not be read is listed as *N lines could not be read*, with its line number, its original text and the reason. Those lines are **never** added.
- 6 Press **Review N dates**, then **Yes, add N**. As a non-owner admin it reads **Yes, queue them for review** instead.

⚠ CAREFUL

Read the list of unreadable lines before you commit. Twenty-eight dates importing when you believed you had thirty is worse than a refusal, so the parser hands you every line it could not read rather than skipping it quietly.

📌 GOOD TO KNOW

Clear empties the box without touching anything already saved.

Designing the calendar page

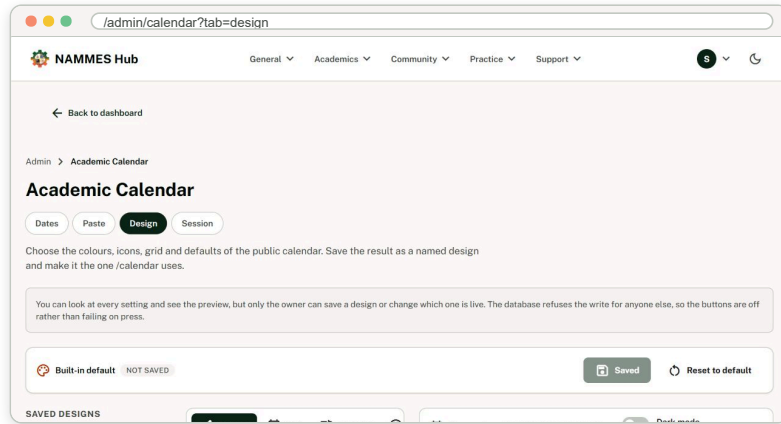

Figure 56. The Design tab: saved designs, the control panel and a live preview.

The **Design** tab is in three columns: your **Saved designs** on the left, the **control panel** in the middle, and a **Live preview** on the right with a dark mode toggle.

GROUP	WHAT IT CONTROLS
Accents	Per kind: its label, its colour, an advanced colour if the swatch is not quite right, and its icon.
Grid	<i>Week starts on Monday or Sunday, Show Saturdays and Sundays, Density comfortable or compact, how many items a day holds before more, and Ring today's date.</i>
Defaults	Whether the page opens on <i>Month</i> or <i>Agenda</i> , which <i>kinds</i> and which <i>sources</i> are switched on, and whether the <i>Next up</i> strip appears.
Page	The page accent colour and the corner roundness.

- Colours come from eight swatches: *Brand, Forest, Flame, Ember, Sand, Green, Amber, Red*. An off-list colour falls back to the nearest swatch rather than shipping something unreadable.
- Make live** applies a saved design to the public page immediately. **Rename**, **Delete** and **Save as new design** manage the list.
- Non-owners see every control and the preview, but the save buttons are disabled.

📌 GOOD TO KNOW

Phones ignore the *opens on Month* default and always start in agenda view. A month grid on a small screen is mostly empty space, so that one decision is not worth a setting.

The active session

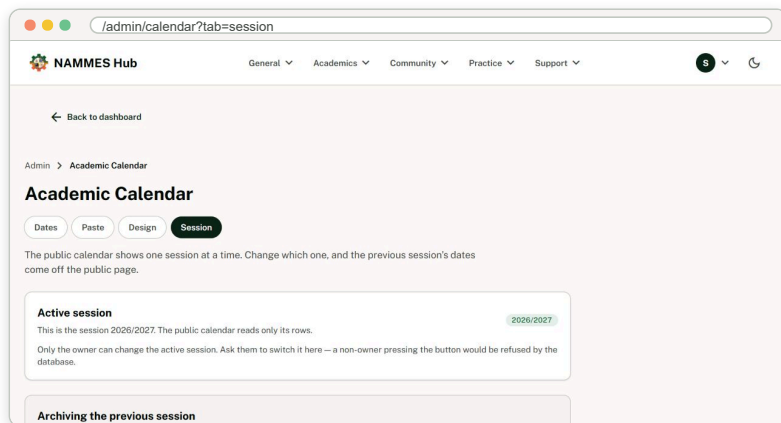

Figure 57. The Session tab. Changing the active session is owner-only.

The **Session** tab shows the **Active session**, and under it a *Sessions with dates* list where any row can be made active with one click and a confirmation.

① GOOD TO KNOW

Archiving is not a flag and nothing is deleted. Switching the active session simply changes which session the calendar page is showing. Last year's dates stay exactly where they are, fully editable under *Dates*. That is why the screen explains archiving in its own panel rather than hiding it behind a button.

🛡️ ADMIN ONLY

Starting a new session is **owner-only**. A non-owner sees the button greyed out rather than an error, because there is no review path for it. Do this once a year, after the senate publishes the next calendar.

Email reminders

Each date with a **Remind (days before)** value sends an email to every member who has notifications on, that many days ahead. Members who have opted out are not included, and an address that has already had this reminder is not sent it twice.

- Reminders go out on the day the countdown reaches zero, not at a fixed hour, and "today" is read in **Africa/Lagos** rather than on the server clock. The server runs UTC, and the two disagree for five hours a day — which would send every exam reminder hours early or hours late.
- A reminder is tied to the date *and* the address. That pairing is what stops one student receiving the reminder and everyone else silently receiving nothing.
- Nothing is sent for a date with no start date, or with the reminder field left empty.
- If the *calendar* feature switch is off, no reminders go out either.

 ADMIN ONLY

Reminders go through the same email queue as everything else, so a failing mail provider is retried and shows up on the **System** page rather than losing the message. See Chapter 27.

23

Building Forms

Create registrations, surveys and applications, style them to match your event, share them by link or QR code, and read the answers.

IN THIS CHAPTER

- The Forms list
- Creating a form
- Question types
- Designing how it looks
- Sharing a form
- Reading responses and exporting

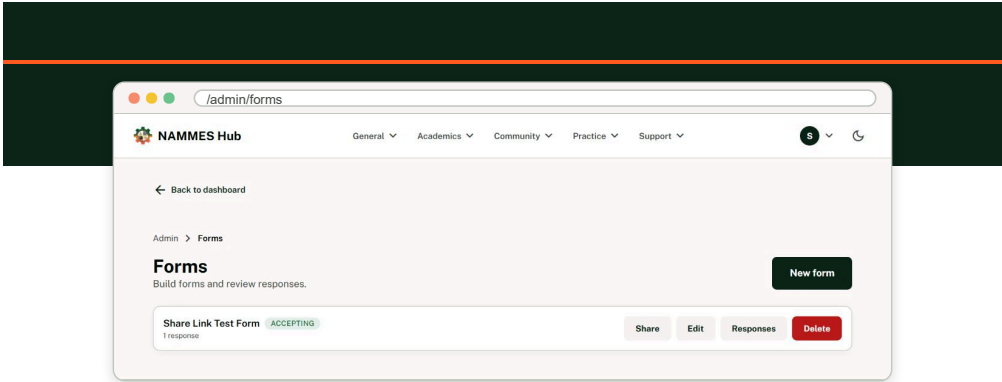

Figure 58. The Forms list, with the share, edit, responses and delete buttons on each row.

Admin → Forms lists every form with a status label: **Accepting** or **Closed**. Each form has buttons to **Share**, **Edit**, view **Responses** and **Delete**. Choose **New form** to start.

CAREFUL

Deleting a form permanently removes **all its questions and all its responses**. Export the responses first if you might need them.

Creating a form

STEP 1: THE BASICS

SETTING	WHAT IT DOES
Title (required)	The form's name, shown at the top and in the list.
Description	Optional intro text under the title.
Category	Event, Application, Survey or Other, shown as a badge on the Forms page.
Accepting responses	Switch off to close the form immediately.
Require sign-in to respond	Only signed-in members can answer. Leave off for public sign-ups; anonymous answers are protected by the human check.
Limit to one response per person	Available when sign-in is required. Stops duplicate answers.
Allow editing a response after submit	Lets members correct their answers later.
Hide the navbar while filling	Respondents see only the form, with a back link in the header. The closed and already-answered screens keep the navbar.
Closes at	Optional date and time when the form closes by itself.

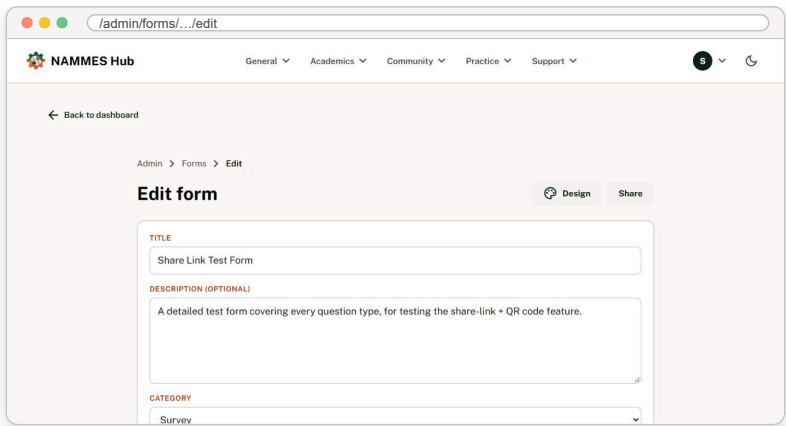

Figure 59. The form editor. The settings grid, including the focus-mode switch, sits near the top.

GOOD TO KNOW

Hide the navbar while filling strips the menu bar and footer from the filling-in screen only. A closed form, a form that needs sign-in, and the page showing someone their submitted answers all keep the navbar, so there is always a way back. Editing a response is the same plain screen as filling it in. Off by default, per form.

STEP 2: ADD QUESTIONS

Choose to add a question, then type it (*Question*), add optional *Helper text*, pick a type, and set the **Required** switch. Drag the handle (: :) on the left of any question to **reorder** them; use the arrow to expand or collapse a question, and the bin to remove it. Every question needs a label, and questions with options need at least one option.

Question types

TYPE	USE IT FOR	EXTRA SETTINGS
Short answer	A name, matric number, phone number.	-
Paragraph	Feedback or long explanations.	-
Multiple choice	Pick exactly one option.	Your list of options
Checkboxes	Pick any number of options.	Your list of options
Dropdown	One option from a long list (levels, hostels).	Your list of options
Linear scale	Ratings, such as 1 to 5.	Minimum, Maximum, and labels for each end
File upload	Receipts, CVs, screenshots.	-
Date	Birthdays, availability.	-
Time	Preferred time slots.	-

Each question can also carry its own **image** and its own **text style**, marked *Customized* when you have changed it.

Designing how it looks

Choose **Design** in the editor to open the design studio. Use *Controls* to change things and *Preview* (on a phone) to see the result. It has six tabs:

TAB	WHAT YOU CAN CHANGE
Themes	One-tap presets: NAMMES, NAMMES Dark, Classic, Midnight, Ocean, Forest, Sunset, Lavender, Rose, Paper, Slate, Mint, Noir and Glass.
Background	Page background as a default, a solid colour, a gradient (with angle) or an image.
Cards	Card colour, opacity, corner roundness, border, shadow and card size.
Text	Colour, size, bold, italic, underline and alignment for the title, description and questions.
Header	A header picture, cropped to a ratio such as 1:1, 4:3, 16:9, 21:9 or 3:1.
Layout	Form width: narrow, medium or wide.

TIP

Start with the **NAMMES** theme so the form matches the Hub, then tweak only what your event needs. Presets only set the starting look; every value stays editable.

Sharing a form

Choose **Share** on the list or inside the editor. A window shows the form's **direct link** and a **QR code** you can **download as a picture** for flyers, slides and posters. The form also appears automatically on the public Forms page while it is open.

Reading responses and exporting

Choose **Responses** on a form. The page has three tabs:

TAB	BEST FOR
Summary	Charts and totals for each question, to spot the big picture at a glance.
Table	Every response in a spreadsheet-style grid.
Individual	Reading one person's full answers at a time.

Choose **Export CSV** to download every response as a spreadsheet file that opens in Excel or Google Sheets, named after the form. The button is greyed out until at least one response exists.

 HANDLE WITH CARE

Responses may contain names, matric numbers and contact details. Download only what you need, store the file somewhere private, and delete it when you are done.

24

Running Live Quizzes

Build a quiz, style it, host it on a projector, turn on practice and battles, and read the results.

IN THIS CHAPTER

- The Live Quiz page
- Building a quiz
- Question banks: how long a game is
- Importing and exporting
- The Design Studio
- Backdrops and result cards
- Hosting a game
- Ending or deleting a game
- Test bots
- Practice and battles
- Reports and rankings

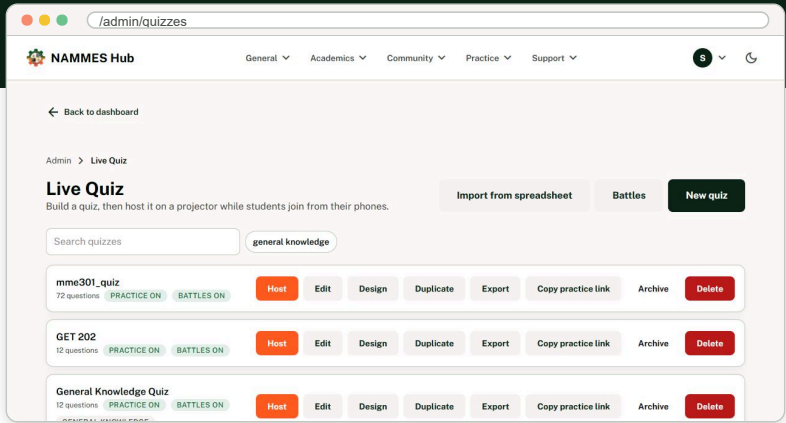

Figure 60. The Live Quiz page: every quiz with its question count, badges and buttons.

Admin → Live Quiz (under *Engagement*) lists every quiz with its question count and small badges such as *Practice on* and *Battles on*. Across the top are **New quiz**, **Import from spreadsheet** and **Battles**. Beneath the list, *Recent games* shows the games you have hosted, each with a **Report** link.

Each quiz has these buttons:

BUTTON	WHAT IT DOES
Host	Starts a live game of this quiz (see below). Disabled until the quiz has at least one question.
Edit	Opens the question editor.
Design	Opens the Design Studio for this quiz.
Duplicate	Makes a copy called "Copy of ..." with all its questions, then opens it.
Export	Downloads the quiz as a spreadsheet (CSV), useful as a backup.
Copy practice link	Appears when practice is on. Copies the link to share with students.
Archive / Restore	Hides a finished quiz from the main list without deleting it.
Delete	Removes the quiz for good.

A **search box** and **tag chips** help you find a quiz when you have many.

Building a quiz

- 1 Choose **New quiz** and type a *Quiz title*. Add optional *Tags*, separated by commas (for example *freshers, revision*).
- 2 Set *Max players*, the default limit for games of this quiz. You can change it each time you host.

- 3 Add questions. Pick the *Type of the next question* first, then add it. Type the *Question*, fill in the answers, and **tick the circle** next to the correct one.
- 4 Set each question's **time limit** and **points** and, if you like, a **difficulty** (this helps the test bots behave realistically).
- 5 Choose save. You will see "Quiz saved."

QUESTION TYPES

TYPE	HOW TO SET IT UP
Multiple choice	Two to four answers; leave a box empty for fewer than four.
True or false	The two answers are filled in for you; choose which is correct.
Number answer	Enter the <i>Correct answer</i> and an <i>Allowed margin (plus or minus)</i> . Put units in the question, not the answer.
Typed answer	List the <i>Accepted answers</i> , one per line, up to 8. Capital letters, accents, punctuation and extra spaces are ignored when matching.
Poll (no score)	Two to four options and no correct answer. Good for opinions; it never changes anyone's score or streak.

PICTURES, MATHS AND DOUBLE POINTS

- **Add a picture:** choose a file, drag one in, or paste it (JPG, PNG or WebP). It is shrunk for phones. You must **describe the picture** in the alt-text box so that everyone can follow the question. Use *Replace* or *Remove picture* to change it.
- **Maths:** wrap a formula in dollar signs, for example **Solve 5×2** . A live *Preview* shows how it will look.
- **Double points round:** switch it on for a question to make it worth twice as much, with a banner for players.

GAME EXTRAS AND BATTLE OPTIONS

At the bottom of the editor, **Game extras** switches the fun rules on or off for the whole quiz: *Streak bonus*, *Power-ups* (Double down and 50/50) and *Comeback boost*. Keep them off for a serious quiz.

Practice mode has an *Open for practice* switch, and **Battle mode** has an *Open for battles* switch. Both are **off by default** for every quiz, so you decide which quizzes students may replay or duel on. Switching one off ends access immediately.

TIP

To reuse questions, choose *Add questions from other quizzes*, search, tick the ones you want and add them. You do not have to retype.

The question bank

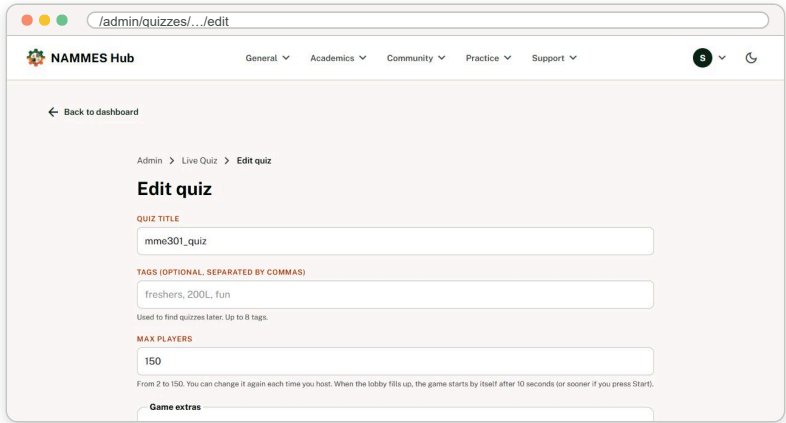

Figure 61. The question editor. The Question bank panel sits between Game extras and Practice mode.

Every question in a quiz is the **bank**. Just below *Game extras*, the **Question bank** panel decides how much of it a game actually asks.

SETTING	WHAT IT DOES
Questions to ask	Leave it blank and every question is asked, in the order you wrote them. Set a number and each game draws a different mix from the bank.
Questions per battle	Only appears once <i>Questions to ask</i> has a number. A battle is two people at their own pace, so it is usually shorter. Leave it blank to use the same number as the game.
Shuffle the questions	Players get a different mix each time, so nobody can memorise question 3.
Shuffle the answers	The options to each question move around, so position stops giving the answer away. Questions such as <i>All of the above</i> are never shuffled, because shuffling them would break them.

A live line underneath confirms the result in plain words: *This game will ask 15 of 30 questions. A battle will ask 10.*

① GOOD TO KNOW

These same settings govern **live games, battles and practice**, so you learn them once. A game **freezes its draw when it starts**, so editing the quiz halfway through an event cannot change how many questions are left.

🛡️ ADMIN ONLY

A quiz with no bank settings keeps behaving exactly as it did before: every question, in order, with its answers as written. Nothing changes until an admin asks for it.

CAREFUL

A knockout bracket needs enough questions to knock everyone down to one. The lobby only offers match lengths that the bank can actually finish, so raising the draw count can shorten the list of choices.

Importing and exporting

Import from spreadsheet accepts a **.csv file** (up to 1 MB) or text pasted straight from Excel or Google Sheets. A preview table shows every question and highlights problems by line number; **nothing is saved until you confirm**. Each row is one question: type, question, options A to D, the correct answer (a letter, or the number or accepted answers for typed questions), seconds and points. A quiz can have up to 200 questions. Use *Export* first to see a correctly formatted example.

The Design Studio

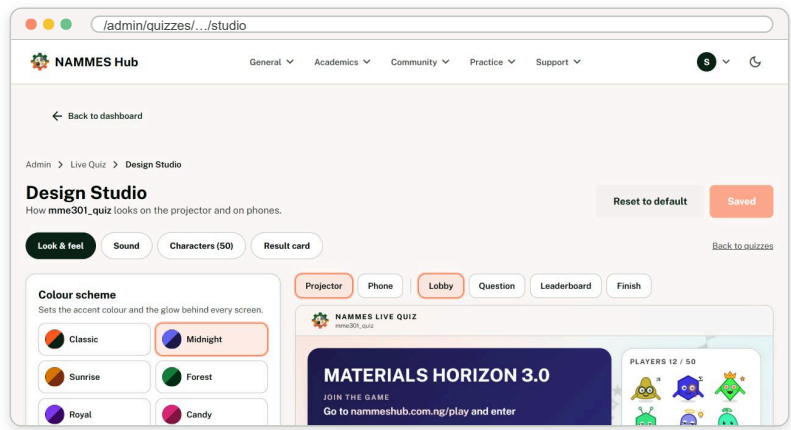

Figure 62. The Design Studio, with its four tabs and a live projector preview beside the controls.

Choose **Design** on a quiz to style how its games look. The studio shows a live preview (a projector on one side and a phone on the other) and is split into four tabs: **Look & feel**, **Sound**, **Characters (50)** and **Result card**. Inside *Look & feel*:

SECTION	WHAT YOU CAN SET
Colour scheme and accent colour	The overall palette, or your own custom accent colour.
Celebration	The falling shapes on the podium: maths symbols, stars, petals or none.
Event message	An optional headline and tagline for your event.
Logo and sponsors	Upload an event logo (or keep <i>Use the NAMMES mark</i>) and up to six sponsor logos. Sponsors appear only on the big screen, never on phones.

SECTION	WHAT YOU CAN SET
Sound	Lobby and question music (off, chill, hype, afrobeat, disco, cinematic or a track you imported) and sound effects, each of which can be switched off on its own.
Characters (50)	A gallery of all 50 characters in every mood.
Result card	How the shareable result picture looks. See below.

THE BACKDROP

The **Backdrop** is the pattern behind the content. It is there to stop a big screen reading as a flat wall of colour, and it is deliberately faint so text stays legible. Choose a pattern — *My image*, *Maths symbols*, *Dots*, *Grid*, *Waves*, *Sparkles* or *Plain* — then set it with four controls:

CONTROL	WHAT IT DOES
Strength	How present the pattern is, 0 to 100%. The default is 8%, which is visible on a projector without competing with the text.
Size or Zoom	How large the pattern repeats, or how far into your picture it zooms. The label follows your choice: <i>Size</i> for a pattern, <i>Zoom</i> for an uploaded image.
Blur	Softens it, 0 to 24px. Useful for a photograph behind text.
Fade back	Images only. Fades the picture towards the page colour, 0 to 90%.

Choosing *My image* reveals **Upload a picture** and a **Fit** choice: *Fill the screen*, *Whole picture* or *Stretch to fill*, each with a plain-English line saying what it does.

① GOOD TO KNOW

Size, *Blur* and *Fade back* all disappear when the pattern is **Plain**, because they would have nothing to act on.

🔒 ADMIN ONLY

An uploaded backdrop picture shows on the **projector only**. It is never sent to players' phones, so a large photograph costs nobody's data. Choosing *My image* and then removing the picture falls back to *Plain* rather than leaving a broken frame.

THE SOUND LAB

The music is generated in the browser rather than played from a recording, so the only honest way to choose a loop is to hear it. Open the **Sound** tab: press *Play* on any card to hear that loop for twelve seconds (one at a time, and it stops by itself), then *Use this* to pick it. Below that, every sound effect has a button of its own, grouped by when the game plays it: countdown ticks, a drum roll the answer lands on, a cheer, and the board settling. Press

Stop the music first if you want to hear an effect on its own.

① GOOD TO KNOW

The music plays in the lobby and during questions, quieter during questions so you can be heard, and stops for the reveal, the leaderboard and the end. **Turn the projector sound on with one click** when the host screen opens, because browsers block audio until you interact with the page.

SWITCHING A SOUND OFF

Every sound effect has a switch of its own beside its *Play* button. Anything you switch off is silent for the whole game, on the projector and on players' phones alike, and the setting is saved with the quiz, so it follows the quiz to whichever computer you host from. *Play* still makes a sound for a switched-off effect, so you can always hear what you have just turned off. The music choice is separate and always applies.

① GOOD TO KNOW

Switching off *Drum roll* also removes the pause before the answer appears, so the answer goes up straight away instead of waiting for a beat that will never arrive.

YOUR OWN MUSIC AND SOUND EFFECTS

Your own audio lets you import a background track and your own sound effects. Nothing is uploaded: each clip is kept in the browser on the computer you imported it on. Once a clip is imported you can play it, use it in place of a built-in sound effect from the list beside that effect, or pick it as the *My music* card for the background.

- 1 Press **Import music** or **Import sound effects** and choose a file. MP3, OGG, WAV and M4A all work.
- 2 Play it to check it, then use it: choose a track on the *My music* card, or pick your clip from the list under a sound effect.
- 3 Press *Delete* on a clip to take it off this computer. A quiz that used it falls back to the built-in sound.

⚠ CAREFUL

Clips stay in the browser that imported them. Nothing is uploaded and no other computer gets them, so a quiz that uses one plays the built-in sounds anywhere else. Clearing this browser's site data deletes them for good, and a browser can still throw stored files away when a device runs out of space. Host from the computer you imported on.

① GOOD TO KNOW

Limits: music up to 15 MB and 8 minutes, a sound effect up to 1 MB and 10 seconds, and up to 40 clips in 100 MB altogether. A clip is measured before it is stored, so a file the browser cannot play is refused rather than saved to be discovered mid-game. An imported drum roll decides how long the answer is held back, so trim yours to end on the hit. Only import audio you have the right to play.

THE RESULT CARD

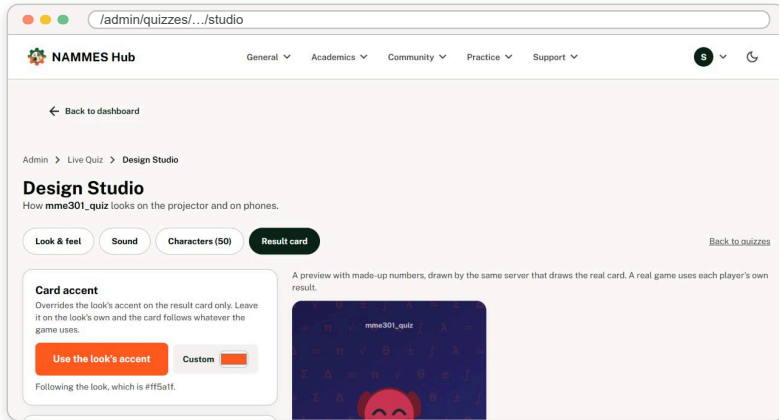

Figure 63. The Result card tab. It saves separately from the rest of the look.

The **Result card** tab sets the picture players get at the end of a game. It has its own **Save card** and **Reset card**, so a card change never leaves the rest of the look looking unsaved.

- **Card accent:** *Use the look's accent* keeps the card in step with the quiz, or *Custom* gives it a colour of its own.
- **Card background:** upload, replace or remove a picture. With no picture the card uses the same maths pattern as the screens.
- **What the card shows:** six switches for *The cartoon character*, *The quiz title*, *Rank* and *"placed 3 of 42"*, *Correct answers*, *Best streak* and *Team name*.

Beside the controls is a live **Result card preview**, drawn by the same server that draws the real card but with made-up numbers, so you can check the look without hosting a game.

① GOOD TO KNOW

Card settings are copied into each game when it starts, exactly like the theme. Editing the card never restyles a game that is already running, and never rewrites a card a player has already been given.

Choose **Save look**. The look applies to **new games** only; a game already running keeps the look it started with.

Hosting a game

- 1 On the Live Quiz page choose **Host** on the quiz. In the *Host game* box set *Max players* (the default is 50) and, if you want teams, switch on *Play in teams* and pick a preset (such as levels or colours) or type your own team names (2 to 8), and choose *average* or *total* scoring.
- 2 Confirm. The **projector screen** opens with the six-digit code, a QR code and the live player list. Put this window on the projector.
- 3 Wait for players to arrive. When ready, press **Start**. (If the lobby fills up, it starts on its own after a short countdown.)

- 4 For each question: the question and countdown show. When time ends, or everyone has answered, the answer distribution and right answer appear. Press **Next** for the leaderboard and again for the next question.
- 5 After the last question the **podium** and final results appear. You can *Download results (CSV)* and open a **Result card** right there.

HOST CONTROLS

CONTROL	WHAT IT DOES
Lock lobby / Unlock	Stops new players joining without starting the game.
Open a player's menu in the lobby	Choose <i>Rename</i> to "Player ###" for an unsuitable nickname, <i>Kick</i> to remove someone (they see a message), or <i>Kick and block</i> to also stop that nickname rejoining.
Pause (P)	Freezes the clock on every screen. Nobody loses time.
+10 s (+)	Adds ten seconds to the running question, up to a minute in total.
End question (Space)	Closes the question early.
Skip question	Discards it: no points and no change to streaks. It asks "Sure? Skip it" first.
Game menu (the ⋮ button)	Ends or deletes the game. See below.
Result card	On the final screen, opens the board card for this game so you can check it before players start sharing.
Mute and volume	A speaker button on the projector screen.

ENDING OR DELETING A GAME

The **Game menu**, behind the round ⋮ button in the corner of every host screen, holds two things that are worth knowing before you need them.

ITEM	WHAT IT DOES
End game now	Stops the game where it stands. Everyone still playing sees the final results, and the report keeps everything that was played. It is hidden when the game is in a state where ending would make no sense.
Delete this game	Removes the game and everything recorded for it. While still in the lobby the item reads <i>Cancel and delete this game</i> , because nothing has been played yet.

Both ask you to confirm first: *Yes, end it* or *Yes, delete*. The same two options sit on each row of *Recent games* on the Live Quiz page, and *Show all / Show fewer* reaches back through older games.

① GOOD TO KNOW

Ending keeps the report. Deleting does not. If you hosted a real event and want the results on file, end the game rather than deleting it. Deleting a finished game also removes the CSV you would otherwise have exported.

WHAT THE GAME PLAYS BY ITSELF

With sound effects switched on, the projector plays a ping each time a player joins the lobby, and a tick in the last five seconds of a question (faster in the last two). When time runs out there is a horn and a short drum roll: the right answer, the vote counts and how many people got it right are all held back until the last beat of the roll, then a happy or sad sting plays depending on how many got it right. A round most people got right also gets a cheer. The leaderboard chimes once per row that climbed, and the podium gets a fanfare and a cheer. Switch effects off and everything appears straight away with no sound, exactly as before. Nothing communicates anything on its own: every answer, score and result is on the screen as well.

① GOOD TO KNOW

Keyboard shortcuts on the projector screen: **Space** ends the question, **P** pauses, **L** locks or unlocks the lobby and **+** adds time.

⚠ CAREFUL

Turn the projector sound on with one click when the page opens, because browsers block audio until you interact with the page. And test the venue Wi-Fi before the event: a weak connection is the most common thing that goes wrong.

If you close the host tab by accident, open the game again from *Recent games* on the Live Quiz page. The game picks up where it was. Any admin can continue any game.

Test bots

In the lobby, **Test bots** adds computer players so that you can rehearse, or fill a small room. Choose a *quick amount* and a skill: gentle bots are right about 65% of easy questions, sharp bots about 97%, and *Mixed crowd* blends them. Bots only answer **while the host page is open**, and they are counted in the results, so use them for rehearsals, not for real events.

Practice and battles

Switch on *Open for practice* and students can replay the quiz at [/practice/...](#) (use *Copy practice link*). Switch on *Open for battles* and it appears on the battle page for challenges and duels.

In the host lobby a **Bracket** button turns the game into a knockout: choose the match length (*1 question*, or *Best of 3* or *5 questions*) and the skill of the bot that fills an odd place. The big screen then shows the bracket live. Teams and brackets cannot be combined.

Choose **Battles** on the Live Quiz page to see two lists:

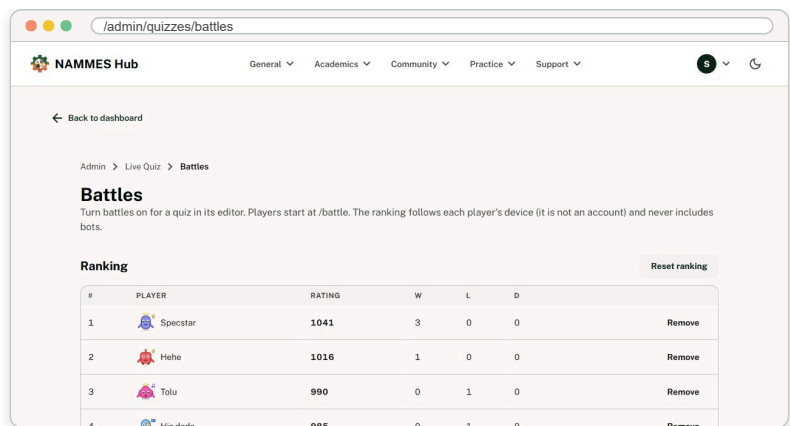

Figure 64. The Battles screen: ranking, recent battles, and the community quizzes people have built themselves.

- **Ranking:** the rated players. Choose *Remove* to take one player off (for example a rude nickname), or *Reset ranking* to clear **everyone's rating**.
- **Recent battles:** the latest duels and challenges, with a *Cancel* button for an open one.
- **Community quizzes:** quizzes people have built from their own questions at `/make`. They are deleted after 30 days, and *Remove* takes one off if it should not be there. They appear nowhere else on the public site.

ADMIN ONLY

Reset ranking cannot be undone. It asks you to confirm (Yes, *reset*). Do it at the start of a new session, not in the middle of a competition.

Reports

When a game ends, choose **Report** on it (under *Recent games*) to see how it went:

- **Summary cards:** players, average score, average accuracy, average response time and how many stayed to the end.
- **Question by question:** accuracy, average time, number who answered and the spread of answers, with the hardest and easiest questions called out.
- **Players:** a sortable table of rank, nickname, score and accuracy. Team games also show team standings.
- **Knockout bracket:** who beat whom, for bracket games.
- **Result card:** opens the board card for this game, drawn by the same server that draws the card players receive.
- **Export CSV** and **Print / Save as PDF** for the department's records.

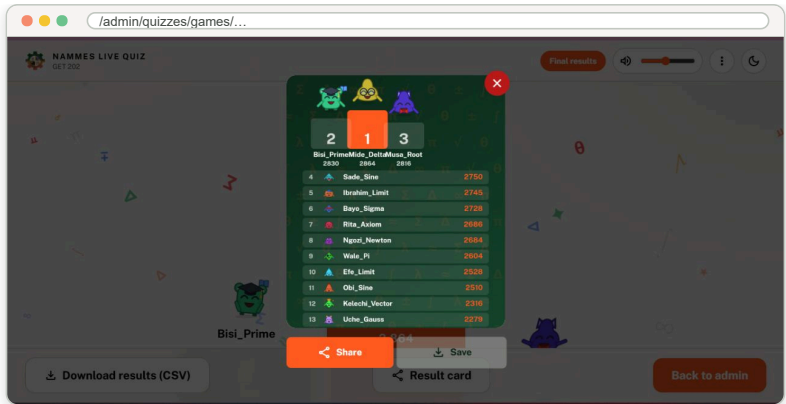

Figure 65. A result card opened from the host screen.

A report can be deleted; this removes the game, its players and all their answers for good. Nicknames on a report are whatever players typed, so handle the file with the same care as any attendance list.

ADMIN ONLY

Reports, rankings and the Live Quiz page are visible to **admins only**. Players never see other people's answers, and there is no public results link.

Publishing CBT practice exams

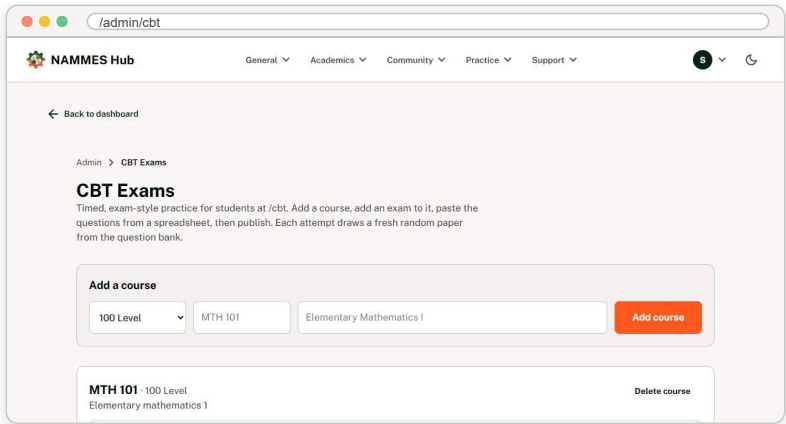

Figure 66. CBT Exams. Courses at the top, each with its own list of papers.

Timed practice papers live behind their own Admin tile, **CBT Exams**, and are entirely separate from quizzes. The difference is that a CBT paper is built from a **question bank** and every attempt is clocked and scored against a pass mark, rather than being played live.

- 1 **Add a course:** pick a level, type the **course code** (such as **MTH 101**) and the course title, then **Add course**.

- 2 Inside the course, name the paper and choose **Add exam**. A house title like *2024/2025 CBT EXAM* is a good pattern.
- 3 Open the exam to set its settings: **Title**, **Session**, and **How the paper is made** — a *Random draw from the bank* so every attempt differs, or a *Fixed paper* that is identical each time.
- 4 Set **Questions per attempt**, **Time allowed (minutes)** and **Pass mark (%)**. A live line confirms *Each attempt will have N questions*.
- 5 Switches: *Shuffle the questions*, *Shuffle the answers*, *Show explanations in the review*, *Allow study mode (no timer)* and *Published*.
- 6 Add questions to the **Question bank**, then **Save settings**.

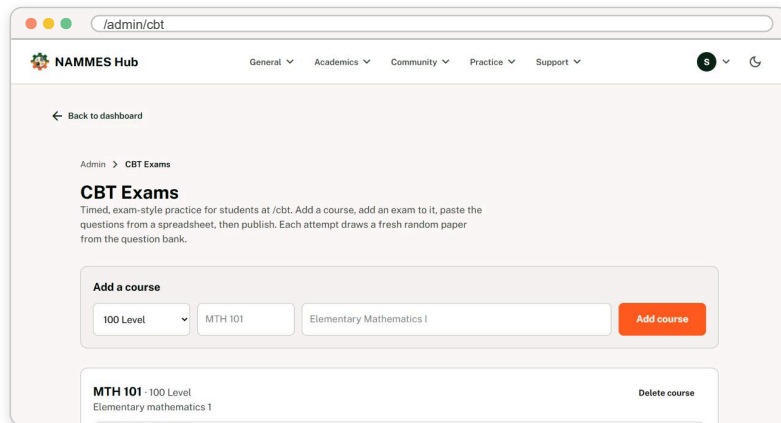

Figure 67. An exam opened for editing: its settings, and the question bank below them.

THE QUESTION BANK

- **Download as spreadsheet** gives the column layout:
`type, question, option_a, option_b, option_c, option_d, correct, seconds, points, explanation, topic, no_shuffle`.
 The `explanation` column is what students see in the review afterwards.
- **Add questions from a spreadsheet** accepts pasted text or an uploaded **CSV**. Choose **Add these questions** to append, or one of the *Replace* buttons to swap the whole bank out.
- **Show questions / Hide questions** collapses the list when it is long enough to be in the way.

⚠ CAREFUL

An exam with no questions is hidden from students even when it is marked *Published*, and the screen says so. Add questions before you tell anyone the paper is ready.

HOW STUDENTS ARE DOING

Under the same panel: **Attempts**, **Average score**, **Pass rate**, **Average time**, and **Most missed questions**. That last one is the valuable column — a question almost everybody misses is often a wrong answer key or a badly worded question rather than a class-wide misunderstanding, so it is the first thing to check.

① **GOOD TO KNOW**

Study-mode sessions are labelled in a student's history but are **excluded** from these statistics. A student who read the answers while learning should not drag the pass rate down for the rest of the class.

25

Running the Awards

Create a season, move it through five stages, curate the shortlist and reveal the winners.

IN THIS CHAPTER

- Creating a season
- Moving through the stages
- Curating the shortlist
- Results and the reveal

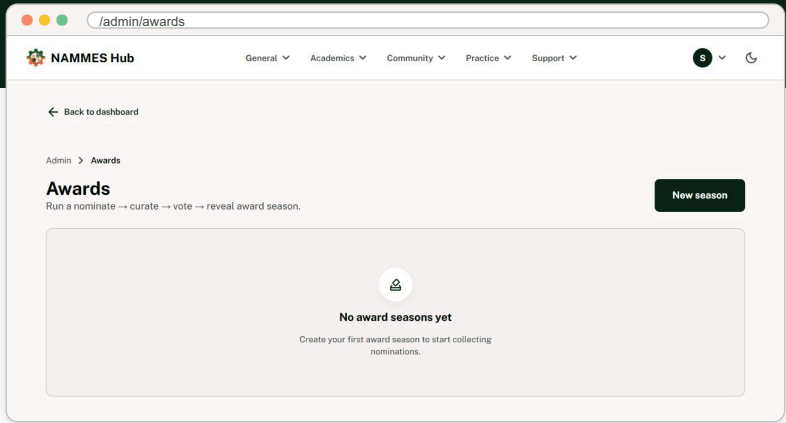

Figure 68. Awards. Every season with its current stage, and the buttons to move it along.

Admin → Awards lists every season with its current stage. Choose **New season**.

- 1 Give the season a **Title**, for example *Materials Horizon Awards 2026*.
- 2 Add **categories**. Each has a title (such as "Most Innovative Student") and an optional description. Add as many as you need.
- 3 Save. The season begins in the **nominating** stage.

① GOOD TO KNOW

You can only change a season's categories while it is in the **nominating** stage. After that they are locked so nobody's nominations are disturbed. Admins' edits go through the owner's review.

Moving through the stages

Open a season to edit it. A green badge shows the stage, and one button advances it to the next. The buttons are worded to say exactly what happens:

	Nominating	Curating	Voting	Closed	Revealed
	Members suggest	You build shortlists	Members vote once	Votes counted	Public results
CURRENT STAGE	BUTTON		WHAT HAPPENS NEXT		
Nominating	Close nominations & start curating		Members can no longer nominate. You build the shortlist.		
Curating	Open voting		The ballot goes live with your shortlist.		
Voting	Close voting		Members can no longer vote.		

CURRENT STAGE	BUTTON	WHAT HAPPENS NEXT
Closed	Reveal results	Winners and tallies become public.

You will see "Phase advanced." after each move. The stage only moves forward, so double-check before you press.

Curating the shortlist

During *curating*, open each category and choose **Curate**. The screen shows the **Shortlist** at the top and, beneath it, the **raw nominations** members submitted, grouped when several people nominated the same name.

- 1 Read the raw nominations and spot the leading names.
- 2 Choose **add to shortlist** for each name you want on the ballot. A nominee photo is used if one was supplied, and you can upload or replace it (JPEG or PNG, 5 MB).
- 3 Remove a nominee from the shortlist if you added the wrong one.
- 4 Repeat for every category before you open voting.

Results and the reveal

Choose **Results** on the season row to see the vote tallies per category. Members only see results after you press **Reveal results**. At that point the public page changes to *Results revealed*, showing each winner with their vote count.

 **BE CAREFUL**

Deleting a season removes all its categories, nominations and votes and cannot be undone. Only

26

Talking to Members

Read what members send you, and send announcements to everyone who wants them.

IN THIS CHAPTER

- Messages
- Broadcasts: email everyone
- Email templates

Admin → Messages

Broadcasts: email everyone

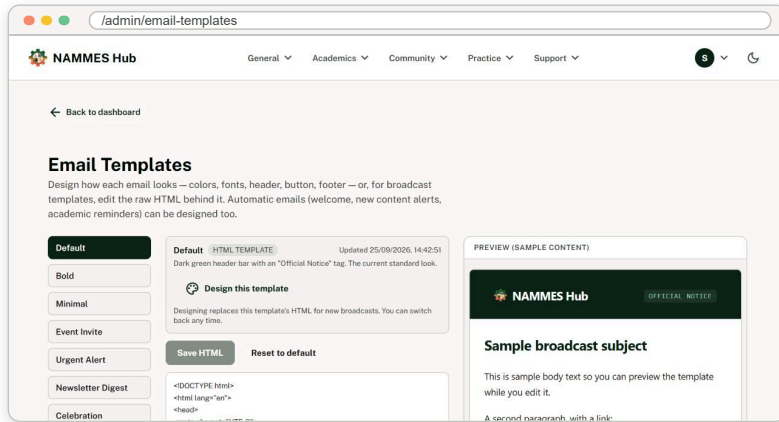

Figure 69. Email Templates: the saved looks a broadcast can be built from.

Admin → Broadcasts is an email designer and sender in one. You build an announcement, see it exactly as members will, and send it to **every member who has left email notifications on**. Use it for exam changes, event invitations and important notices. The screen has the editor on the left and a **live preview** on the right.

- 1 Under **Look**, pick one of the seven templates. Hover over a template to read what it is for.
- 2 Type the **Subject**.
- 3 Build the **Content** from blocks (see below).
- 4 Watch the **preview** update as you type.
- 5 Choose **Send test to me** to receive a copy in your own inbox first. It is the safest way to check how it looks on a phone.
- 6 Choose **Send broadcast**, then confirm with **Yes, send to everyone**. You will see "Queued for N recipients. Delivery starts within a minute or two."

CONTENT BLOCKS

Instead of one big text box, the email is made of blocks that you add, edit and reorder. Nine kinds are available:

Heading Text Image Button Highlight box List Divider Spacer Two columns

CUSTOMIZE DESIGN, SAVED STYLES AND DRAFTS

- **Customize design** opens the design studio for this one email: layout, colours, fonts, header (NAMMES logo, your own logo or none), banner image, call-to-action button, footer and card style. Only fonts that every inbox can show are offered, so the email looks the same for everyone.
- **Save as style** stores a look you like under a name such as *Exam notice*. It then appears under **Saved styles** so any admin can apply it in one tap.
- **Save draft** keeps an unfinished email (*Update draft* after the first save). Your drafts are listed under **Drafts** below the editor and are private to you.
- **History** lists every broadcast sent, with its subject, template, number of recipients and date.

THE SEVEN TEMPLATES

TEMPLATE	LOOK	USE IT FOR
Default	Dark green header bar with an "Official Notice" tag	Everyday announcements
Bold	High-contrast orange header, large headline	Notices that must stand out
Minimal	Text first, no coloured header	Quiet, businesslike messages
Event Invite	Date badge, big image and button	Events and invitations
Urgent Alert	Red accent bar and warning tag	Time-sensitive or safety notices
Newsletter Digest	Editorial layout with dated eyebrow	Weekly or roundup updates
Celebration	Festive orange and green accents	Wins, results and congratulations

⚠ CANNOT BE UNDONE

A broadcast **cannot be recalled** once you send it. Always send yourself a test first, and reread the subject and every block before you confirm. The owner can switch broadcasts off entirely from the System page if something goes wrong.

Email templates

Admin → Email Templates is where the standing designs live: the seven broadcast templates plus the **automatic emails** the Hub sends by itself, namely the **Welcome email** (sent when someone creates an account) and the **new content alerts** for News and Events. Choose one on the left to see it beside a live preview with sample content.

- **Design** opens the same design studio, applied to the template itself, so every future email that uses it picks up the change ("Design saved.").
- **Switch back to the HTML template** undoes a design and returns to the original HTML, and the reset button restores the built-in look.
- For admins comfortable with HTML, a template can also be edited as raw HTML and saved ("Template saved."). Six **placeholder tokens** are swapped for real content each time an email is sent:

TOKEN	REPLACED WITH
<code>{{subject}}</code>	The broadcast subject.
<code>{{body}}</code>	The body text, turned into paragraphs with links.
<code>{{image}}</code>	The uploaded image, or nothing if none was attached.
<code>{{date}}</code>	Today's date, short form.
<code>{{date_full}}</code>	Today's date, long form.
<code>{{site_url}}</code>	The Hub's web address, for links and the logo.

⚠ CAREFUL

If you edit the raw HTML, leave the `{{body}}` token in place or your message text will not appear in the email. If you are unsure, use the design studio instead of the HTML.

27

People, Security and the System

Managing accounts and admins, protecting your own login, approving changes, and keeping the site healthy.

IN THIS CHAPTER

- Users and admin access
- Security: two-factor login
- Reviews: approving changes
- The System page
- Fixing a member's details
- When something goes wrong

Admin → Users		
ACTION	WHO CAN DO IT	WHAT IT DOES
Make admin	Owner	Gives a member admin powers. They must have signed up first.
Remove admin	Owner	Takes admin powers away from an admin.
Disable / Enable	Any admin	Blocks or restores a member's ability to sign in without deleting anything.
Make owner	Owner	Transfers ownership to another admin. You lose owner status. Use it when the leadership changes.
Delete	Owner	Permanently deletes a member's account. Cannot be undone.
Anonymise	Owner	Removes the name, matric number, CGPA data and email, and blocks sign-in, while keeping their votes and contributions.

ADDING A NEW ADMIN

- 1 Ask the person to **sign up** for an ordinary account first.
- 2 Sign in as the owner and open **Admin → Users**.
- 3 Find them (name or matric number) and choose **Make admin**. You will see "Admin access granted."

They can now see the Admin link. You cannot remove yourself, and the owner cannot be removed or disabled by anyone else.

CAREFUL

Prefer **Disable** or **Anonymise** to **Delete**. Deleting a member removes their account entirely, and it cannot be brought back.

Security: two-factor login

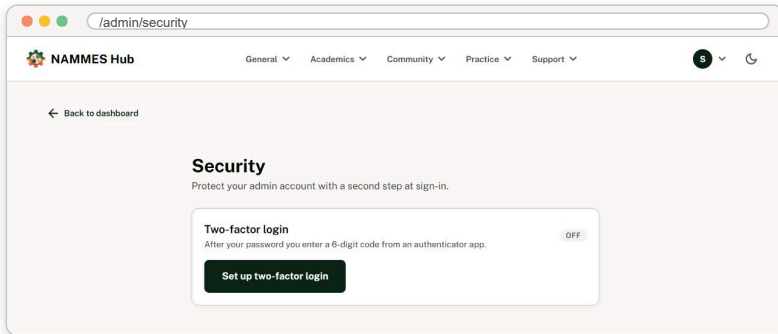

Figure 70. Security. One switch, and the button that sets it up.

Admin → Security lets you add a second step to your admin sign-in, so a stolen password alone is not enough. Everyone with admin powers is strongly encouraged to do this.

- 1 Open **Security** and choose to turn on two-factor login.
- 2 Open an authenticator app (Google Authenticator, Microsoft Authenticator or Authy).
- 3 Scan the QR code, or choose "enter a setup key" and type the key shown under it.
- 4 Type the 6-digit code the app shows and confirm. You will see "Two-factor login is now on."

Q TIP

Copy the **setup key** into a password manager. If you lose your phone, it lets you set the app up again on a new one.

From then on, signing in to the Admin area asks for the current code. To switch it off, choose **Turn off** on the same page. When the owner turns on the *Require two-factor login for admin powers* switch (System page), an admin who has not set it up cannot make changes.

Reviews: approving changes

Admin → Reviews (owner only) is the queue of **News, Events and Awards changes** that other admins have submitted. Each request shows what would change, field by field, so you can compare before and after.

- 1 Read the changes carefully, including the text and pictures.
- 2 Choose **Approve** to publish them ("Approved and published."), or **Reject** and type a **reason** for the admin.
- 3 The admin sees their request as *Pending review* until you decide.

The System page

Admin → System is for the owner. It has five tabs:

TAB	WHAT IT SHOWS
Switches	Master on/off switches for award voting , award nominations , member file uploads , email broadcasts , the contact form and public form responses , the academic calendar , and required two-factor login for admin powers . Each asks you to confirm.
Email queue	Emails waiting to be delivered and their status.
Activity	A log of who did what in the admin area.
Server errors	Problems recorded by the site's back end.
App errors	Problems members' browsers ran into.

① GOOD TO KNOW

The **calendar** switch is the one to know about. Turning it off hides the calendar from the menu, the footer and the banner list, sends `/calendar` back to Events, and stops the reminder emails — all without a deploy. If the senate republishes dates mid-session and the grid looks wrong, this is the quickest way to take it out of circulation while you check.

A **System test** button in the same area checks that the site can write to, and read back from, its error log.

🛑 EMERGENCY BRAKE

The switches are an emergency brake. If a vote is being abused, a form is being flooded with spam, or a broadcast went wrong, flip the matching switch to stop it instantly, then investigate.

Fixing a member's details

A member cannot change their own **matric number**. If someone made a typo, or an older account has none, the owner corrects it directly in the project's database dashboard (Supabase → *Table Editor* → **profiles** table → the person's **student_id**). It must match the department pattern **YY0406XXX** or the save is rejected. The Table Editor is also the fallback for anything the admin screens do not cover, and it needs no code.

When something goes wrong

PROBLEM	WHAT TO TRY
"No changes were saved. Your account may not have admin access."	Sign out and in again; check you are still an admin (ask the owner); if two-factor is required, complete the code step.

PROBLEM	WHAT TO TRY
An upload is rejected	The file is over 5 MB (10 MB for student contributions) or is not JPEG/PNG (PDF for contributions). Compress or convert it.
My News or Event edit did not appear	It is waiting in the review queue. Ask the owner to approve it.
An event is stuck in "Upcoming"	Its date label is unreadable. Edit it to a normal format like 3 October 2026 .
Members see "We'll be right back"	Maintenance mode is on. Switch it off in Site Links.
A broadcast is not arriving	Delivery takes a minute or two. Check the Email queue tab, and that broadcasts are switched on.
A student cannot vote or nominate	Their account has no valid department matric number. Fix it as described above.

APPENDIX A

Quick Reference: Every Page

Public pages

PAGE	ADDRESS	SIGN IN?	ONE-LINE PURPOSE
Home	/	No	News, events and executives at a glance.
About	/about	No	History, mission, vision and values.
Meet the ExcOs	/excOs	No	The Executive Council, with contact details.
Contact	/contact	No	Message the executives.
Calendar	/calendar	No	Lecture, exam and registration dates plus events.
Outlines	/outlines	No*	Course-by-course outlines. *Sign in to contribute.
Curriculum	/curriculum	No	The official CCMAS document.
Timetable	/timetable	No	Class and exam schedules.
CGPA	/cgpa	Yes	Track GPA and plan targets.
Resources	/resources	No	Shared study materials.
Events	/events	No	Programmes and photo galleries.
News	/news	No	Department announcements.
Opportunities	/opportunities	No	Scholarships and internships.
Awards	/awards	Yes	Nominate and vote.
Forms	/forms	Varies	Registrations, surveys, applications.
Quizzes and battles	/quiz	No	The practice hub: join, practise or battle.
Live quiz	/play	No	Join a hosted quiz game with a code.
Quiz battles	/battle	No	Challenge a friend, duel, see the champions.
Pick a quiz to practise	/practice	No	Every quiz open for practice.
Quiz practice	/practice/...	No	Solo revision run of one quiz.
CBT practice	/cbt	No	Timed practice papers with a pass mark.
Make your own exam	/cbt/make	No	Build a timed paper from your questions.
Make your own quiz	/make	No	Build a quiz, exam or battle set.
A quiz you made	/set/...	No	The page for a quiz or exam you built.
Sign In	/login	-	Enter your account.
Sign Up	/signup	-	Create an account.
Forgot password	/forgot-password	-	Get a reset link by email.
Account	/account	Yes	Name, 100 Level session, email alerts.

Admin pages

All begin with **/admin** and need an admin account.

SECTION	ADDRESS	PURPOSE
Dashboard	/admin	All the tiles.
Home Page	/admin/home	Hero and president's message.
Site Links	/admin/links	Newsletter, socials, maintenance mode.
Page Banners	/admin/banners	Top-of-page pictures and text.
News · Events · Opportunities · Resources · Excors	/admin/news ...	Add, edit, delete content.
Handbook	/admin/handbook	Edit this handbook and rebuild its PDF.
Event Gallery	/admin/events/.../gallery	Photos for one event.
Outlines · Submissions · Timetable	/admin/outlines ...	Academics management.
Calendar	/admin/calendar	Dates, paste, design and session, in four tabs.
Forms	/admin/forms	List, new, edit, responses.
Awards	/admin/awards	Seasons, curate, results.
Live Quiz	/admin/quizzes	Quizzes, games, reports, battles and rankings.
CBT Exams	/admin/cbt	Courses, papers and question banks.
Messages · Broadcasts · Email Templates	/admin/messages ...	Communications.
Users · Security · Reviews · System	/admin/users ...	People and safety.

ADMIN ONLY

Four admin pages are deliberately never pictured in this handbook, because they hold members' personal information: **Users**, **Messages**, **Reviews** and **System**, together with **Submissions** and any form's **Responses**. Treat exports from them with the same care as an attendance list.

APPENDIX B

Glossary

Words used in this handbook

TERM	MEANING
Admin	An executive or trusted member allowed to open the Admin area and manage content.
Owner	The one admin who also approves changes, manages people and controls the System page.
The Aegis 26/27	The name of the current Executive Council, for the 2026/2027 session.
Breadcrumbs	The clickable trail (Outlines › 100 Level › ...) that shows where you are.
Broadcast	One announcement email sent to every member who has notifications on.
CBT exam	A timed practice paper with a pass mark, drawn from a question bank and answered only at the end.
CCMAS	Core Curriculum and Minimum Academic Standards, the NUC's official degree blueprint.
CGPA / GPA	Cumulative Grade Point Average across all your semesters, and the Grade Point Average of a single semester.
Bracket	A knockout format for a live quiz: players are paired, winners move on, one champion remains.
Community quiz	A quiz or exam a member has built from their own questions. It lives on its own private link, is deleted after 30 days by default, and appears nowhere public.
Curating	The awards stage where admins turn raw nominations into a shortlist.
Duel	A live quiz battle between two players at the same moment.
Excots	The Executive Council: the students elected to run NAMMES.
Feature flag	A master switch on the System page that turns a whole feature off without a deploy — voting, uploads, broadcasts, the contact form, or the calendar.
Matric number	Your department student number, in the form YY0406XXX.
Maintenance mode	A switch that shows visitors a "be right back" page while admins work.
NAMMES	National Association of Metallurgical and Materials Engineering Students, UNILAG Chapter.
Lobby	The waiting screen of a quiz game, where players gather before it starts.
Outline	A one-page summary of a course: topics, units, texts and links.
Pass mark	The percentage a CBT exam needs before it is recorded as passed.
Practice mode	Solo replay of a quiz, one question at a time, with instant feedback.
Question bank	For a quiz, the pool of questions a game draws from. For a CBT exam, the pool each attempt draws its paper from.
Result card	The tall, phone-shaped picture a player can share after a game, a practice run or a duel.
Review queue	The list of admin edits waiting for the owner to approve.
Senate date	A date the department's senate has approved, such as the start of examinations. Stored as a plain calendar date because every senate item is an all-day entry.

TERM	MEANING
Session	The academic year a page or a calendar belongs to, such as 2026/2027. The calendar shows one session at a time.
SIWES	Students Industrial Work Experience Scheme: industrial training built into the degree.
Study mode	A CBT session with no clock, where each answer is revealed straight away.
Two-factor login	Signing in with your password plus a 6-digit code from an app on your phone.

APPENDIX C

Questions and Troubleshooting

Common questions

- Q I did not get my confirmation email.**

Wait a few minutes, then check your spam or junk folder. Make sure you typed the email correctly. If it still does not arrive, contact an executive through the Contact page.
- Q I typed my matric number wrongly at sign-up. Can I fix it?**

Not yourself. Message the executives through the Contact page and an admin will correct it for you.
- Q The CGPA page just asks me to sign in.**

That is normal: the calculator saves your grades to your account. Sign in and it opens your academic record.
- Q Why can't I vote or nominate?**

The awards are for members with a department matric number (YY0406XXX). If your account has none, or the season is not in the right stage, the page tells you.
- Q A page says "Nothing published yet".**

The executives have not added anything there yet. Come back later, or ask through the Contact page.
- Q How do I stop the emails?**

Open Account and switch Email notifications off. You can turn them on again at any time.
- Q A file will not upload.**

Check its size and type: student contributions accept PDF, JPG or PNG up to 10 MB; photos accept JPEG or PNG up to 5 MB.
- Q The page says I am offline but my wifi is on.**

The Hub checks whether the site is really reachable, not whether your device thinks it has a connection, so this screen is usually correct. It re-checks every few seconds and brings your page back by itself. If it persists, switch to mobile data and back, or close and reopen the tab.
- Q My CBT timer did not stop when I closed the app.**

That is deliberate. The clock belongs to the server, so it cannot be paused by closing the tab, losing signal or switching apps. A refresh brings you back to the same paper with the time that is left.
- Q I built a quiz but it is not in the list.**

A quiz you make is private to its link and appears in no public list, by design. Only its code or link finds it. Check the code, or ask whoever shared it.
- Q There is no Share my result button on my results.**

Either the game finished before result cards existed, in which case the button is hidden rather than broken, or you are on a screen that has no card.
- Q An exam date is missing from the calendar.**

Check the Dates to be announced panel first. Items the senate has approved but not dated are collected there rather than left off the calendar silently. If it is not there either, the executives have not published it yet.
- Q The calendar is not in my menu.**

It can be switched off without a deploy by the calendar feature switch on the owner's System page. Ask an executive if it is missing.

Q Who do I contact about a mistake on the site?

Use the Contact page, or open Meet the ExcOs and reach the right executive directly.

STILL STUCK?

Open www.nammeshub.com.ng/contact , describe what you were doing and what you saw, and one of the executives will help.

APPENDIX D

Meet the Authors

This handbook was written by the Executive Council of NAMMES, University of Lagos Chapter: **The Aegis 26/27**. Between them they lead the association for the 2026/2027 session and look after the Hub you have just learned to use.

Soyemi Eniola
PRESIDENT

Ameh Anthony
VICE PRESIDENT

Odofin Eniola
GENERAL SECRETARY

Adefesobi Nathaniel
PUBLIC RELATIONS
OFFICER

Ayeni Taiwo
ASSISTANT GENERAL
SECRETARY

Richard Emmanuel
FINANCIAL SECRETARY

Akpojotor Franca
TREASURER

Udotong Peace
SOCIAL SECRETARY

Joseph Ofuowoicho
WELFARE SECRETARY

Omoyeni Joseph
SPORTS SECRETARY

With thanks to every member who uses, tests and improves NAMMES Hub. Your questions shaped this book. If something is unclear, reach any of us through the Contact page of the Hub.

Notes

Space for your own reminders: passwords do **not** belong here.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

More Notes

Space for your own reminders: passwords do **not** belong here.

Everything NAMMES Hub has to offer, in one book.

NAMMES Hub is the home of the National Association of Metallurgical and Materials Engineering Students, University of Lagos Chapter: your academic calendar, outlines, timetable, CGPA calculator, resources, events, news, opportunities, awards, forms, live quizzes and practice exams, all in one place.

This handbook walks a complete beginner through every page and shows the executives how to run it.

- Every page of the Hub, explained
- Sign-up, sign-in and your account
- The academic calendar, outlines, timetable and CGPA
- Events, news and opportunities
- Awards and forms, step by step
- Live quizzes, battles and practice exams
- A complete guide for admins
